Frequently asked questions

Which devices can you connect with a Square Reader

Square Reader is compatible with a wide range of Android and iOS devices. Square offers a range of cases, a dock and other accessories to transform your Square Reader into a mobile or countertop POS solution. See the full range of compatible accessories

Does Square Reader require Wi-Fi

You can use Wi-Fi, a hotspot or cellular data to accept payments on Square Reader – and you’ll need an internet connection to process payments.

Does Square Reader need to be charged

Square Reader does need to be charged, but once charged, it has a battery that lasts all day.

Does Square Reader accept contactless and chip and PIN payments

Yes. Square Reader accepts chip cards, contactless (NFC) cards, Apple Pay and Google Pay.
