Charging interface	Type-C interface, support PD3.0 charging protocol
Supported systems	Windows, MacOS, Android, Linux
Size(L*W*H)	124.2*52.8*18mm
Cable length	18cm/0.6ft
Weight	about 145.6g

Frequently Asked Question and Notes

1. The Type-C interface near the end of the Type-C cable only supports PD charging, has no data function, and cannot provide external power output.
2. HDMI1, HDMI2, VGA interfaces can be used at the same time, the product video output supports MST split screen mode, and multiple display devices can be connected at the same time to display different pictures (this function is only for Windows).
3. Limited by device performance and interface, when multiple display devices are connected at the same time, the display device may not reach its maximum resolution and refresh rate.
4. Please use the original charger of the computer/tablet device for charging. If you need to use another charger to charge, please ensure that the charger supports the PD charging protocol and the charging power meets the minimum requirements of the device.
5. When there are many external large-capacity mobile hard disks and other devices, please connect the devices one by one to avoid powering on too many devices at the same time and causing insufficient load.
