How to Setting Printer BSC10 to Support 58mm Paper Size

Product Information

The Printer BSC10 is a versatile printer that supports a paper size of 58mm. It is designed to be connected to a Windows PC via a USB port. Please ensure that you have installed the printer driver before proceeding with the setup.

Product Usage Instructions

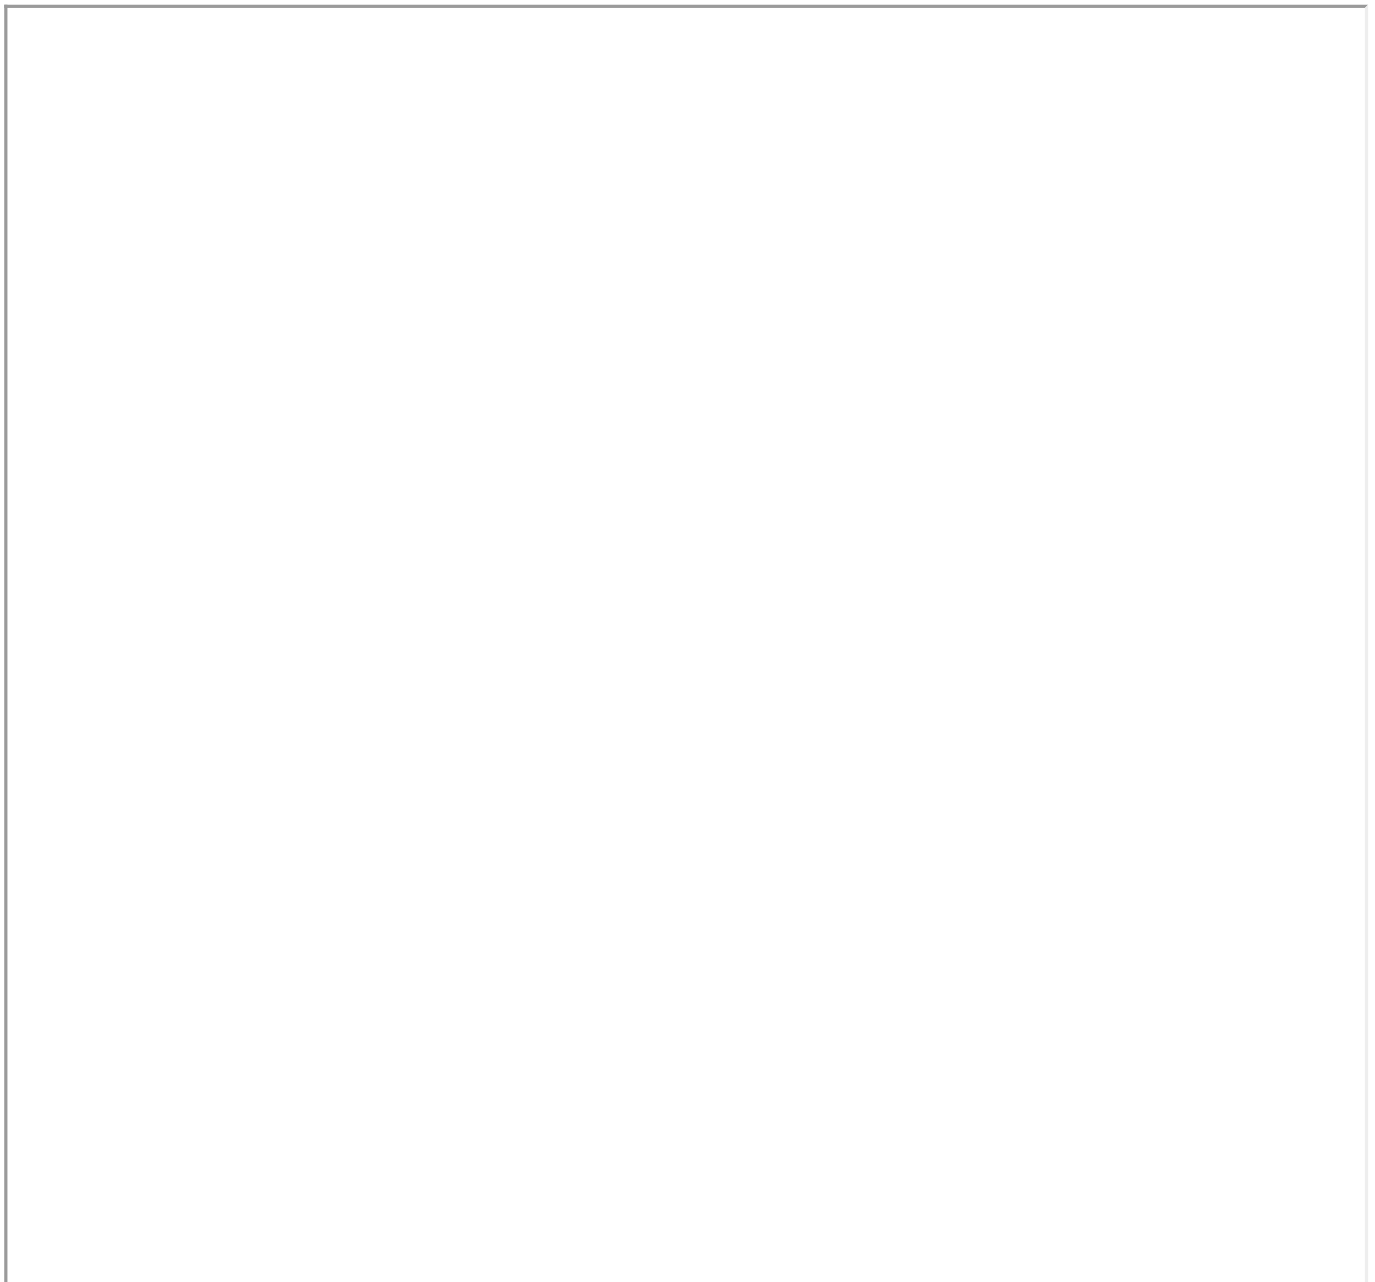

1. Connect the Printer BSC10 to your Windows PC using a USB cable and turn it on. Windows will automatically detect and install the Star BSC10 printer driver. You can verify this in the Control Panel.
2. Right-click on the Star BSC10 printer and select "Printer Properties".
3. In the Printer Properties window, go to the "Advanced" tab and click on "Printing Defaults".
4. In the Printing Defaults window, click on "Advanced".
5. Change the Paper Size to "58mm X Receipt (33 Columns)" and click "OK" twice.
6. Select "Device Setting" and change the FRICTION setting to "58mm X Receipt (33 Columns)". Click "OK".
7. Right-click on the Star BSC10 printer again and select "Printer Properties".
8. In the Printer Properties window, select "Star / Help" and click on "Open Printer Utility".
9. If you do not wish to change the printer name, click "OK" in

the utility.

10. Click on "Printer Setting" and the program will download the current settings.
11. Change the Paper Size to "58mm x Receipt (33 Columns)".
12. Click on "Store" to save the setting.
13. Click on "Print Settings" to print a self-test.

Following these instructions will help you set up the Printer BSC10 to support a paper size of 58mm.
