Hotkey Commands

Hotkey commands are keystroke sequences that initiate computer/device functions and can be used to initiate KVM Switch functions. A hotkey command sequence must be initiated by the HK_LCode (HotKey Leading Code), followed by 1-2 additional keystrokes. Successful hotkey command inputs result in a high-pitch beep. Unsuccessful hotkey command inputs result in a low-pitched beep.

Notes:
– All keystroke combinations must be entered in rapid succession.
– Press and release the indicated keys, unless otherwise specified.
– Numbers entered during the hotkey sequence cannot be entered using a number pad

Option 1
• Scr Lck + Scr Lck
Option 2.1
• Left Ctrl + Left Ctrl
Option 2.2
To change from Left Ctrl to Right Ctrl:
• Left Ctrl + Left Ctrl + Alt (Hold) + Right Ctrl + Release Alt
To change back to Left Ctrl:

Hotkey Command Revision: November 1, 2023

Mouse Roaming

Mouse Roaming is the ability to use a single keyboard and mouse to control multiple computers or devices. It

enables seamless movement of the mouse cursor from one computer's screen to another without needing to physically switch a KM Switch or mouse between computers.
