Step1- Put the mount on the handlebar

Step2- Fix the mount with the rubber string

Step3- Install the computer according to the direction indicated by the arrow, Rotate the bike computer

Step4- Completed

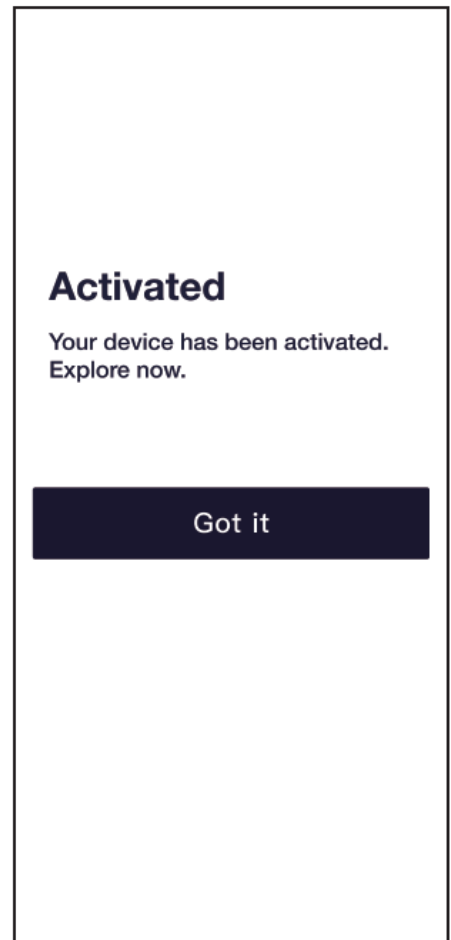

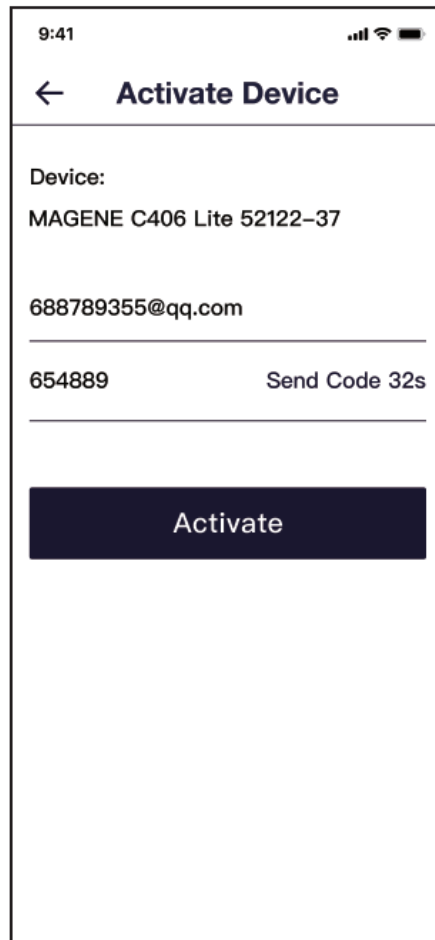

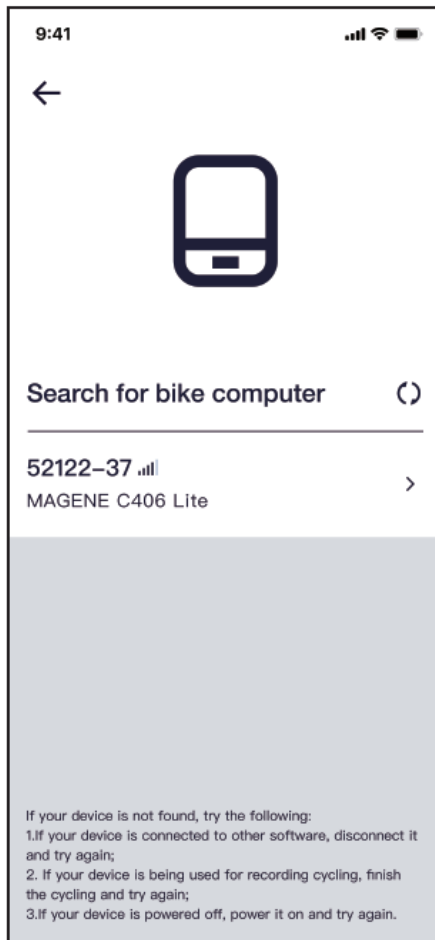

Smart Phone Companion App

After acquiring your C406 Lite computer, please download the Onelap Fit:

1. Activating the GPS Bike Computer

Step 1- Use the App to search for the bike computer. Step 2- Enter a valid mobile phone number to receive a verification code

Step 3- Verification is complete

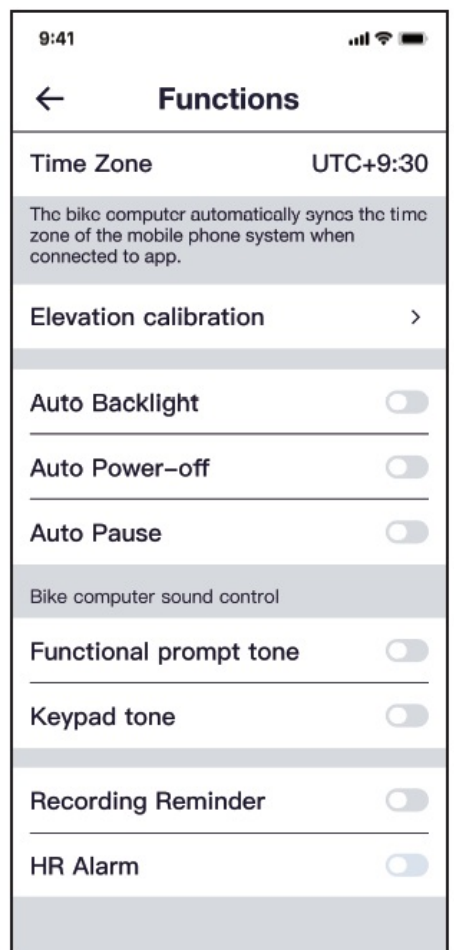

Binding the GPS Bike Computer

Long-press the right-hand button to bind your bike computer with the App. At each startup the app will automatically search for the bike computer look for new ride records and sync the data.

Settings

After completing the activation and binding procedures, you'll be brought to the settings screen. Here you can adjust the number of pages, and the content of each page to give options for a "limitless screen expansion" and adjust the auto-shutdown time, sound on/off, current time zone, personal information, etc.

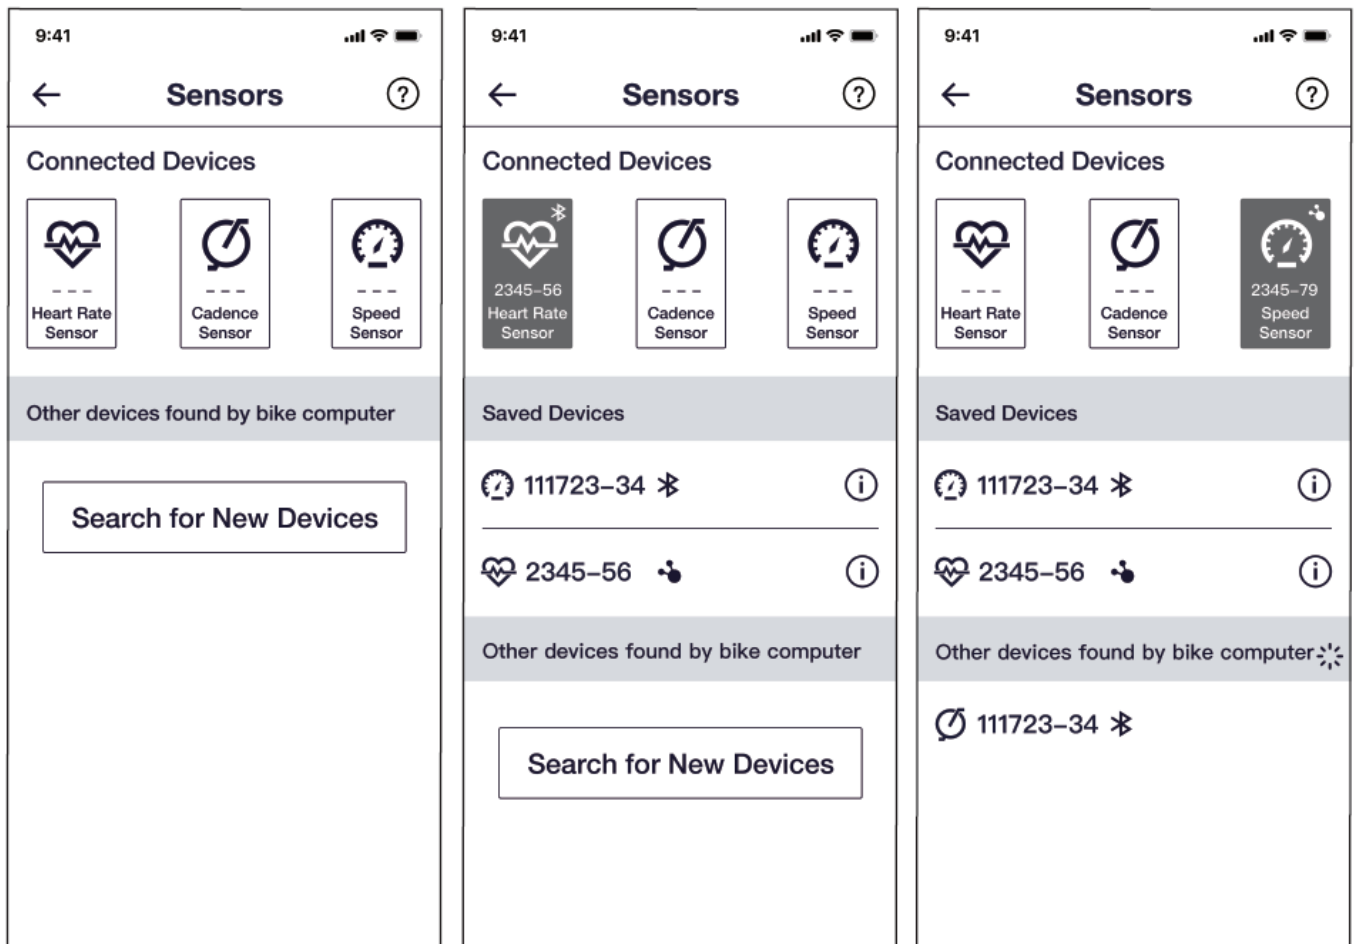

Connecting new sensors

The C406 Lite supports a wide range of external sensors such as speed sensors, cadence sensors, power meters, and heart rate monitors. Please follow these steps to connect your sensors:

Step 1– Search for the sensor

Step 2– Click on your device in the list

Step 3- The device you selected is displayed in the “Connected Devices” position and connection is complete.

5. Syncing and analyzing data

After finishing your ride, open the Onelap App on your phone. The App will automatically sync the data you can also manually send ride records to the phone.

In the App, "Mine", "Ride Records" – you can analyze all ride records on the device.
