**General**

Read and understand all instructions prior to the use of the product. Failure to adhere to instructions and warnings in this document may result in property damage, injury, or death. Product misuse or failure to follow instructions will void the warranty.

Immediately discontinue use if any function is compromised, if parts are missing or loose, or if any component shows signs of excessive wear. Consult with your supplier for repair, adjustment, or replacement.

All persons responsible for fitting, adjustment, and daily use of the devices discussed in the these instructions must be familiar with and understand all safety aspects of the devices mentioned. In order for our products to be used successfully, you must read and understand all instructions and warnings, and maintain our products according to our instructions on care and maintenance.

The installation instructions will guide you through this product's options and possibilities.

Instructions are written with the expressed intent of use with standard configurations. They also contain important safety and maintenance information, as well as describe possible problems that can arise during use. For further assistance, or more advanced applications, please contact your supplier or **Stealth Products** at (512) 715-9995 or toll free at (800) 965-9229.

Always keep the operating instructions in a safe place so they may be referenced as necessary.

All information, pictures, illustrations, and specifications are based on the product information that was available at the time of printing. Pictures and illustrations shown in these instructions are representative examples and are not intended to be exact depictions of the various parts of the product.

**Important Information**

These products are designed to be fitted, applied, and installed exclusively by a healthcare professional trained

for these purposes. The fitting, application, and installation by a non-qualified individual could result in serious injury.

## CAUTION

These products are designed to be fitted, applied, and installed exclusively by a healthcare professional trained for these purposes. The fitting, application, and installation by a non-qualified individual could result in serious injury.

### Warranty

Our products are designed, manufactured, and produced to the highest of standards. If any defect in material or workmanship is found, Stealth Products will repair or replace the product at our discretion. Any implied warranty, including the implied warranties of merchantability and fitness for a particular purpose, shall not extend beyond the duration of this warranty. **Stealth Products** does not warrant damage due to, but not limited to: misuse, abuse, or misapplication of product, and/or modification of product without written approval from **Stealth Products, LLC**. Any alteration or lack of serial number, where applicable, will automatically void all warranty.

**Stealth Products, LLC** is liable for replacement parts only. **Stealth Products, LLC** is not liable for any incurred labor costs.

**Stealth Products** warrants against failure due to defective materials or workmanship:

**Covers: 2 years**  
**Hardware: 5 years**  
**Electronics: 3 years**

**NOTICE** Any substitutions of supplied hardware void the warranty. Misuse of items and “acts of nature” (e.g., flood, tornado) are not covered by the warranty.

In the event of a product failure covered by our warranty, please follow the procedures outlined below:

Call **Stealth Products** at (512) 715-9995 or toll free at (800) 965-9229. Request a Return Authorization (RA) form from the Returns Department and follow the documentation instructions.

Additional warranty information may be found by visiting the website at <https://stlpro.site/returns-n-warranty>. Copies of this manual may be downloaded by accessing the Stealth website (<https://stlpro.site/stealth-docs>) and searching “P150D700” in the search bar at the top of the page.

### Warning Labels

Warnings are included for the safety of the user, client, operator, and property. Please read and understand what the signal words **DANGER**, **WARNING**, **CAUTION**, **NOTICE**, and **SAFETY** mean, and how they could affect the user, those around the user, and property.

## **DANGER**

Identifies an **imminent** situation which, if not avoided, may result in **severe injury, death, and property damage**.

## **WARNING**

Identifies a **potential** situation which, if not avoided, may result in **severe injury, death, and property damage**.

## **CAUTION**

Identifies a **potential** situation which, if not avoided, may result in **minor to moderate injury and property damage**.

## **NOTICE**

Identifies important information not related to injury, but possible **property damage**.

## **SAFETY**

Indicates steps or instructions for safe practices, reminders of safe procedures, or important safety equipment that may be necessary.

### **Limited Liability**

**Stealth Products, LLC** accepts no liability for personal injury or damage to property that may arise from the failure of the user or other persons to follow the recommendations, warnings, and instructions in this manual.

**Stealth Products** does not hold responsibility for final integration of final assembly of product to end user. **Stealth Products** is not liable for user death or injury.

### **Testing**

Initial setup and driving should be done in an open area free of obstacles until the user is fully capable of driving safely.

## **Design and Function**

### **Intended Use**

The **Simple Solutions Adapter Interface HD** is designed to accommodate a wide range of back supports, as necessary, while maintaining support and stability, and remaining lightweight. It is intended for users who require extra width or height capacity for their back support system.

### **Features**

The **Simple Solutions Adapter Interface HD** offers:

- width, height, depth, and independent link offset adjustment;
- back angle, rotational, and lateral adjustment capabilities, as well as highly adjustable link mounting options to

accommodate wide, tall, or bi-angular back support configurations;

- heavy-duty construction to meet higher load or force requirements than the original Simple Solution Adapter;
- compatibility with a wide range of back supports;
- little to no loss of seat depth.

### Compatibility

The **Simple Solutions Adapter Interface HD** is designed to be compatible with the following market-available back supports:

- Matr<sup>x</sup>® Elite
- Jay® J3®
- Permobil Acta-Back® and Acta-Embrace®
- ROHO® AGILITY®
- Ride® Java® Back

### Parts & Accessories

#### Parts List

	Description	Qty
A	Adapter Center Plate	1
B	Adapter Wing	2
C	Link Mount	4
D	Adapter Link	4
E	Mounting Plate	4
F	Track Nut	4

## Installation

### Preparations

Only a qualified service technician may install the **Simple Solutions Adapter Interface HD** and its accessories.

### Installation Plan

Set up an installation plan before beginning the installation. This plan should take into account:

- the placement of the interface in relation to the back support;
- the manner in which the interface will be operated, including its attached adjustable laterals; and,
- the amount of clearance necessary for other hardware and accessories.

### WARNING

Incorrect installation of the adapter interface or its accessories may cause damage to the hardware and/or injury to the user.

### Required Tools

Use the proper tools to install and adjust the adapter interface to the user's desired position and specifications. Below are the tools needed to complete the installation of the adapter plate:

Tool	Used On
3mm Hex Key	Flat Head Screws on Mounting Plates
4mm Hex Key	Flat, Socket, and Button Head Screws throughout assembly
10mm Wrench	Nylon Lock Nuts to attach Interface to Shell

(Tools are not provided.)

 **CAUTION**

The use of improper tools may cause damage to the device. Under- or over-tightening fasteners can cause components to fail or cause the user discomfort. The tools required to install additional accessories are detailed in the manuals provided with those accessories.

**Installing the Adapter to the Back Support**

Nearly any positioning requirement can be met with the **Simple Solutions Adapter Interface HD**.

**Step One – Loosen the Fasteners:** Loosen the fasteners necessary to adjust the Adapter Wings (B), Adapter Links (D), and Mounting Plates (E) to mount to the back shell.

**Step Two – Adjust the Width:** Adjust the Adapter Wings (B) to the approximate width of the slots in the back shell. The four flat head screws that secure the Adapter Wings (B) to the Adapter Plate (A) can be installed in three different mounting positions to accommodate an extra two inches (2") in width. Choose the best position and snug the flat head screws to secure the Adapter Wings (B) in position. See "*Adjustment – Mounting Plate Width Adjustment*".

**Step Three – Height Setting:** Using the button head screws attaching the links to the Adapter Wings (B), adjust the Adapter Links (D) and Mounting Plates (E) vertically to match the mounting slots in the back support. To achieve the best support, the Mounting Plates (E) should be mounted as wide as the mounting locations of the back support will allow. Mounting Plates (E) may be mounted as shown below (Vertical configuration) to fit taller back supports, or to accommodate bi-angular configurations. See *Adjustment – Mounting Plate Height Adjustment*.

**Step Four – Mounting Plate Rotation:** If necessary, loosen the flat head screws and rotate the Mounting Plates (E) to properly orient the slots in the Mounting Plates (E) with the mounting locations of the back support. See *Adjustment – Mounting Plate Rotation*.

**Step Five – Depth Setting:** Loosen the screws securing the Adapter Link (D) segments and adjust the angle of the links and the Mounting Plate (E) to adjust the depth of the back support. Tighten the socket head screws to secure the links in the new position. Note that in the vertical configuration (shown above right) the Mounting Plates (E) can be positioned at different angles to allow a bi-angular back support installation. See *Adjustment – Link Adjustment*.

**Step Six – Attach the Shell:** Insert the button head screws through the fender washers and the front (user) side of the back support and attach to the Mounting Plates (E) using nylon lock nuts.

**Step Seven – Install Adapter Plate to the Chair:** Align the mounting locations on the Adapter Plate (A) with the mounting posts on the chair back. Slide the Adapter plate over the posts and it should slide into position on the posts.

**Step Eight: Install the Thumb Screw:** The thumb screw is designed to hold Adapter Plate (B), and the back support attached to it, securely to the spine of the chair. Do not attempt to operate the chair without installing the thumb screw into the location shown in the image above.

**Step Nine – Tighten All Fasteners:** Check all fasteners for tightness. The fasteners should be snug but not over-tightened.

#### **WARNING**

The thumb screw securing the adapter plate in position on the knobs is **required** for the installation of the **SSAPT4-HD**. Do not attempt to use the chair unless it is properly installed.

## **Adjustment**

### **Link Adjustment**

The UniLink™ Adapter Links are used to provide fine width and lateral positioning adjustment capability for a back support.

**Step 1:** Loosen the 4mm socket head screw at the link that needs adjustment.

**Step 2:** Rotate the link to the desired position.

**Step 3:** Tighten the 4mm socket head screw to secure the link in the new position. The screw should be snug, but do not overtighten it.

### Mounting Plate Rotation

The Mounting Plates (E) can be rotated to one of four positions (90° apart) to align with mounting holes of a back support.

**Step 1:** Loosen and remove the 3mm flat head screw securing the mount to the link.

**Step 2:** Remove the mount from the link and rotate it in increments of 90° to align the pin with one of the four adjustment holes in the mount.

**Step 3:** Replace the mount on the link and secure with the 3mm flat head screw. The screw should be snug, but do not overtighten it.\*

\* Thread locking compound may be used, if desired.

### Mounting Plate Height Adjustment

The links can be moved vertically to align with differently spaced mounting locations in the back support. Ideally, these should be spaced as far apart as the back support will allow.

**Step 1:** Loosen the two 4mm button head screws securing the link to the plate.

**Step 2:** Slide the link up or down to the new position.

**Step 3:** Secure the link in the new position by tightening the two 4mm button head screws. The screws should be snug, but do not overtighten them.

### Mounting Plate Width Adjustment

The Adapter Wings (B) are adjustable to fit different width back supports.

**Step 1:** With the 4mm hex key, loosen the four flat head screws securing the wing to the adapter interface.

**Step 2:** Slide the wing into its new position. If more width is needed, the flat head screws may be relocated to the locations shown to gain one or two inches of width, per side.

**Step 3:** Tighten the four flat head screws to secure the wing in its new position. Make sure the screws are snug, but do not overtighten.

### Removing and Reinstalling the Adapter

This is the final step in the implementation of the **Simple Solutions Adapter Interface**. Further adjustments to the interface or attached back support are possible without removal from the chair or made easier by the simplicity of the removal and installation of the adapter.

**Step One:** Remove the thumb screw from the lower left of the center spine, as shown in the image to the right. Align the Adapter Center Plate with the knobs located on the center spine of the chair.

**Step Two:** Slip the adapter plate over the knobs and press it into position. Replace the thumb screw in the lower left hole of the adapter, as shown.

## WARNING

The thumb screw securing the adapter plate in position on the knobs is **required** for the installation of the **SSAPT4-HD**. Do not attempt to use the chair unless it is properly installed.

## First-Time Use

### Dealer Assistance

During first-time use by the client, it is advised that the dealer or service technician not only explains the product, but also assists in the configuration of user positioning to the customer (i.e., the user and/or the attendant). If needed, the dealer can make final adjustments.

### User Testing

It is important that the customer be fully aware of the installation of the **Simple Solutions Adapter Interface HD**, including how to use it and how it can be adjusted to fit the client comfortably. As a dealer, proceed as follows:

Explain and show the customer how you have executed the installation and explain the function.

- Have the user test the position of the **Simple Solutions Adapter Interface HD**.

- Is the hardware in the proper position for the client?
- Can the user safely operate all wheelchair controls with minimal effort?

If needed, make any adjustments to the positioning. Explain possible problems to the customer and how to address them.

### **Conditions of Use**

The **Simple Solutions Adapter Interface HD** is intended for use as installed by the dealer, in accordance to the installation instructions in this manual.

The foreseen conditions of use should always be communicated by the dealer or service technician to the user and/or attendant during first-time use.

If the usage conditions change significantly, please contact your dealer or qualified service technician.

## **X**

### **Disinfection**

- Wipe gently with a cloth dampened with a household disinfectant.

### **Maintenance**

The following care and guideline instructions will keep hardware and covers in good condition for a longer period of time and prevent damage.

- Periodically check and tighten any loose fasteners.
- Check all components for any signs of wear or breakdown.
- Wipe gently with a cloth dampened with a household disinfectant.
- Gently remove dust and dirt from hardware with a soft damp cloth

### **CAUTION**

Always check mounting hardware before using the adapter interface.

### **NOTICE**

Improper installation or alterations of any kind will void this product's warranty.

### **CAUTION**

#### **Maximum Weight Capacity:**

450 lbs. (204.11 kg)

### **SAFETY**

Replace or repair parts as needed.
