### ACM Side Splitters

Includes:  Screws (16x)

- STEP: 1**
- Position the jack stand near the back and front of the side skirt Position the Side Splitter to the side skirt Street Aero Logo towards the rear bumper Side Splitter should reach from one end to the other
- STEP: 2**
- Pre-drill the side skirt and Side Splitter with 3/32" or smaller bit size See the chart below for the recommended spacing of the screws

Side Splitter Size	Screw Spacing
60-70 inches	8 inches
71-75 inches	8.5 inches
76-80 inches	9.25 inches
81-86 inches	9.8 inches

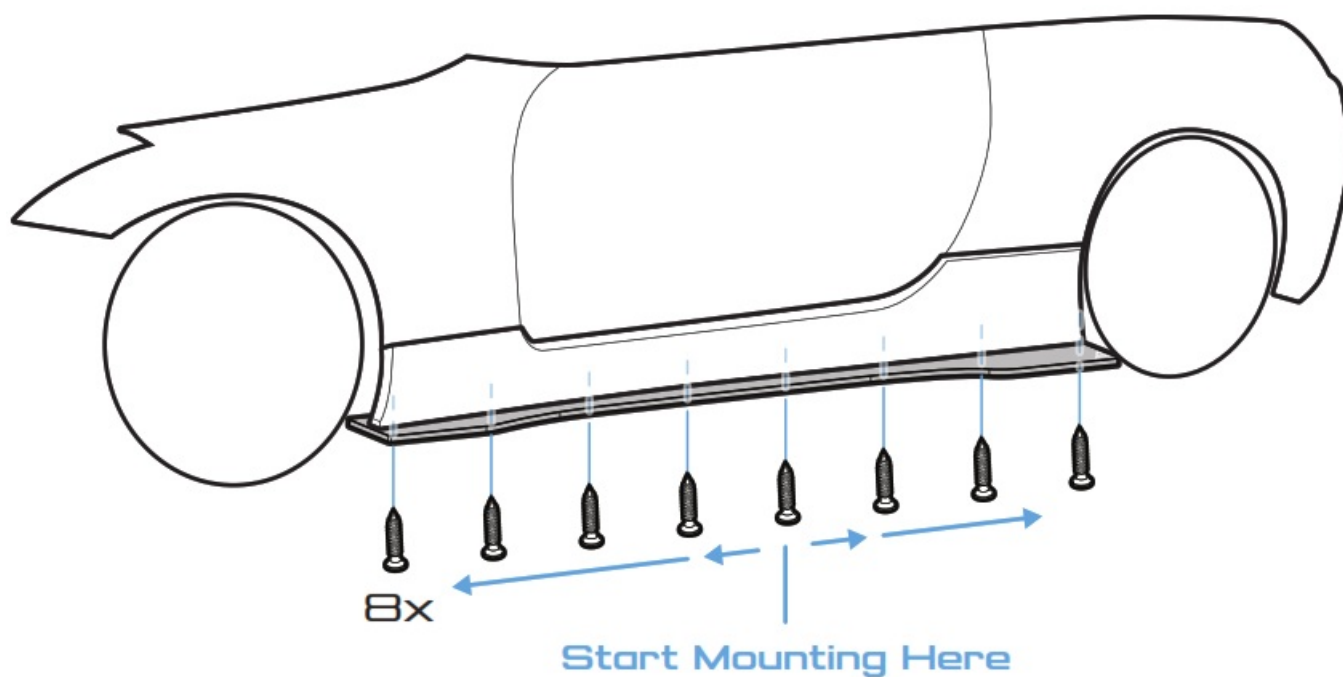

**NOTE:** Spacing may differ based on your side skirt

**NOTE:** Position the jack stand at the Side Splitter's pinch welds

**STEP: 3**

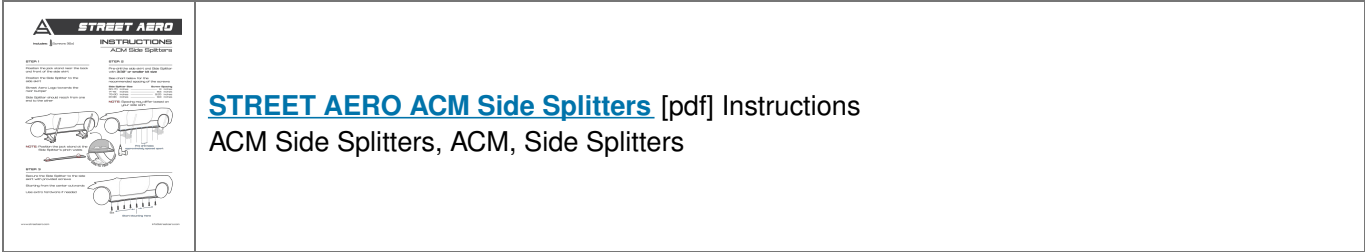

Secure the Side Splitter to the side skirt with provided screws Starting from the center outwards Use extra hardware if needed
