Dimensions

Specifications

- Fits on Trailer Trays (CC-255)
- Adapter kits for A frame and 4" square bumper available January 2024
- Aluminum diamond plate won't rust
- Maximum generator dimensions: 29" wide, 21" tall, 14-3/8" deep

Warnings

Gen Secure (CC-200) is designed to discourage theft of stored items under lock and key. All safes can be cracked, so please be aware we can slow a thief down, but cannot prevent the most motivated burglar. In short, we are not responsible for stolen items from our locked box.

Vents are provided in our generator box to allow residual propane fumes and gas fumes to exhaust while parked or traveling.

When operating your generator the CC-200 lid must remain open to properly create enough airflow to cool your generator. Lid must remain open until generator is cool to the touch.

There is a lock knob to help you secure the lid in your desired position. The lid is limited to opening just past 180 degrees to protect your vehicle's siding.

Rubber access ports can be scored and used to:

1. Allow access to cords and plugs.
2. Allow direct venting of exhaust fumes and residue via a tube if you wish to hook one up.

Tie down rings have been welded into our box to secure any materials stored – including a generator – with our provided tie down straps.

This product can expose you to chemicals including lead, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.
