Technical Specifications

Dimensions: 6.7 x 3.3x 1.6 Inches

· Weight: 1.1 Pounds

· Battery Capacity: 1 6000mAh

Input: Quick Charge (5V=2A;9V=2A)

Output: 5V, 2.1A; Quick Charge(5V=3A;9V=2A;12V=1.5A); Jump Starting 12V vehicles

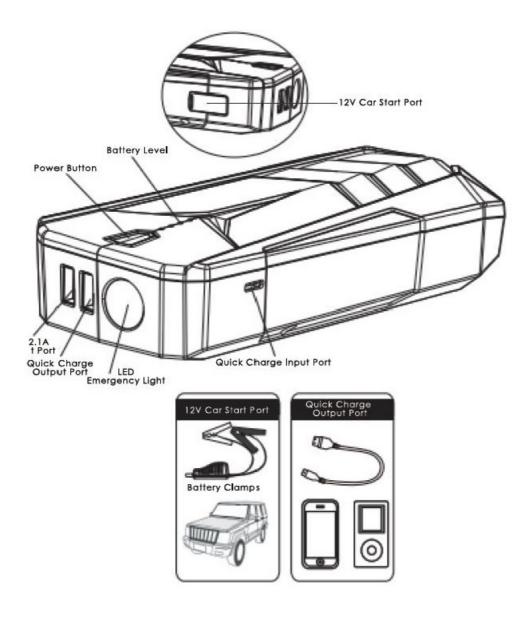

Charging Times: 3 Hours

Starting Current Rating: 300A Peak

· Current Rating: 1500A

Operating Temperature: -20°C – 60°C 4

Product Description

What's In The Box

- SP-JS01 Lithium Jump Starter
- USB Charger
- Battery Clamps
- Micro USB Cable
- Type-C Cable
- User Guide

Understanding Charge LEDs

Press the power button, the battery level will indicate as follows:

LED	4 LEDs off	1LED illuminates	2 LEDs illuminates	3 LEDs illuminates	4 LEDs illuminates
Battery Level	0%	25%	50%	75%	100%

During the charging process, the charge LEDs flashes cyclically. All LEDs are off that indicates the charging is suspended/end.

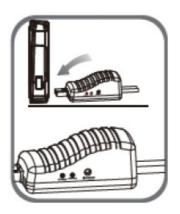

Charging the SP-JS01

- 1. Plug the USB charger into the socket.
- 2. Connect the SP-JS01 using the included USB Charge Cable to the USB IN port and the USB charger.

Jump Starting 12V Vehicles

- 1. Verify the voltage and chemistry of the battery. Connect the Battery Clamp Connector to the Jump Starter.
- 2. Confirm the battery clamps are connected to the correct polarity battery terminals.
- 3. Please follow the instructions of the battery clamp indicator light to perform the corresponding operations.

Green LED will illuminate, indicating that SP-JS01 is ready to jump start your vehicle.

If the battery clamps are connected in reverse, the Red LED will illuminate and beep. Reverse the connections to clear this error and then the Green LED will illuminate.

The green LED flashes that means the battery voltage is too low, please press the BOOST button, wait for the green LED illuminate, and complete the startup within 30 seconds.

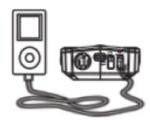

The red and green LED are off and no beep sound that indicates the battery may be completely damaged. Please make sure that the positive and negative poles are connected correctly and press the BOOST button, wait for the green LED luminate, and complete the startup within 30 seconds.

- 4. Try starting the vehicle.
- 5. Once you have started your vehicle, disconnect the battery clamps.

Charging Your Smartphone/Pad

- 1. Connect the USB cable to Quick Charge Output Port.
- 2. Connect to electronic products such as smartphone/pad.
- 3. Press the power button to automatically identify the appropriate parameters of the electronic products, and start charging the electronic product.

Switch between different modes of LED lights

1. Long press the power button for 3 seconds to turn the flashlight "On". Press once for strobe, again for SOS.
