SUNSLICE

SUNSLICE Volta Magnetic Wallet with Magsafe External Battery

- www.sunslice-solar.com

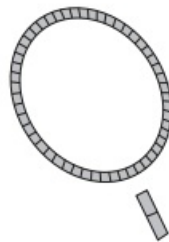

INTRODUCTION

Thank you for choosing Sunslice. We hope you will have a great experience using the Sunslice Volta. The Volta has been developed with the ultimate goal of enabling people to gain access to energy anywhere. This adjustable stand supports portrait and landscape modes. It doubles as a phone stand, offering the best viewing angles for videos, calls, or browsing, at home, work, or on the go. It can be use with our MAGSAFE powerbank (optional). Making this card holder the best option for your outdoor activities. This manual contains important safety and product care information as well as step-by-step instructions for using your Volta. To get the greatest benefit from your purchase, we recommend you thoroughly read the manual.

ADJUSTABLE STAND

To use the Sunslice Volta Magnetic Wallet, simply attach the back of your phone to the wallet's magnetic surface and adjust it to the desired standing position. Its adjustable stand supports both portrait and landscape orientations, offering angle adjustments from 15° to 170°—perfect for watching videos, using FaceTime, or browsing. If your phone doesn't have MAGSAFE compatibility, you can easily attach the provided Adhesive Ring to your device.

OPTIONAL POWER BANK PRESENTATION

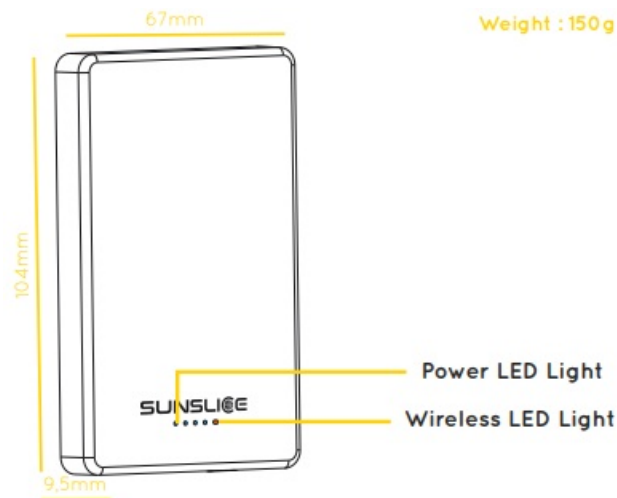

This product is a magnetic wireless power bank designed to provide MagSafe wireless charging for iPhone 12, 13, 14, and 15 models. It supports both wireless and wired fast charging, offering versatility and convenience. With its sleek aluminum alloy design, it exudes a minimalist and modern aesthetic. Additionally, you can opt for a metal bracket or card bracket, making charging and viewing even more convenient. You can purchase this product separately on our website if you didn't buy it as part of a bundle. The power bank is optional and not included if you bought the wallet only.

SPECIFICATIONS POWER BANK

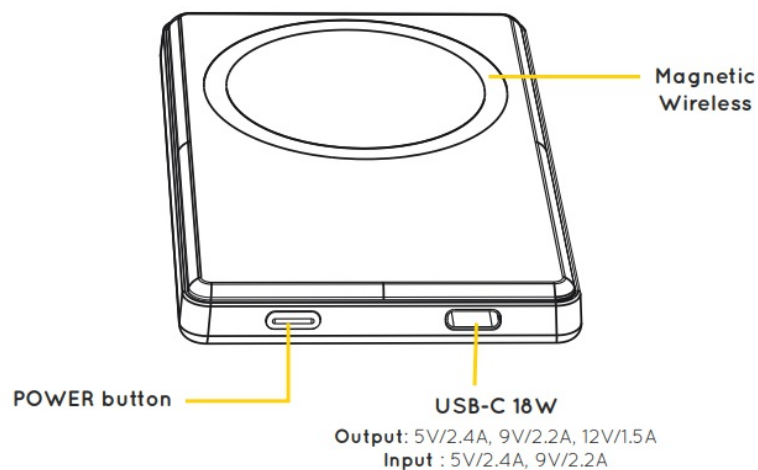

- **CAPACITY** 5'000 mAh
- **TECHNOLOGY** Lithium-Ion

- **CHARGING STATUS** 5 X LED Indicators

Note: QC3.0/ PD Quick Charge wall adapter (18W) required for Fast Charge Mode. We advise the Emperion 45 or 65W from Sunslice

PRODUCT OVERVIEW

INTERFACE

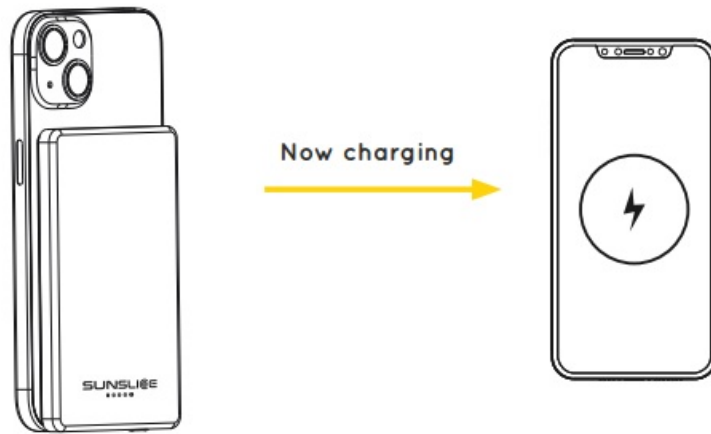

CHARGE THE POWER BANK

Connect the power bank to a QC3.0/PD fast-charging wall adapter. Use the USB-C port to charge the power bank. The battery capacity is indicated by four power lights, with each light representing 25%.

CHARGE YOUR IPHONE

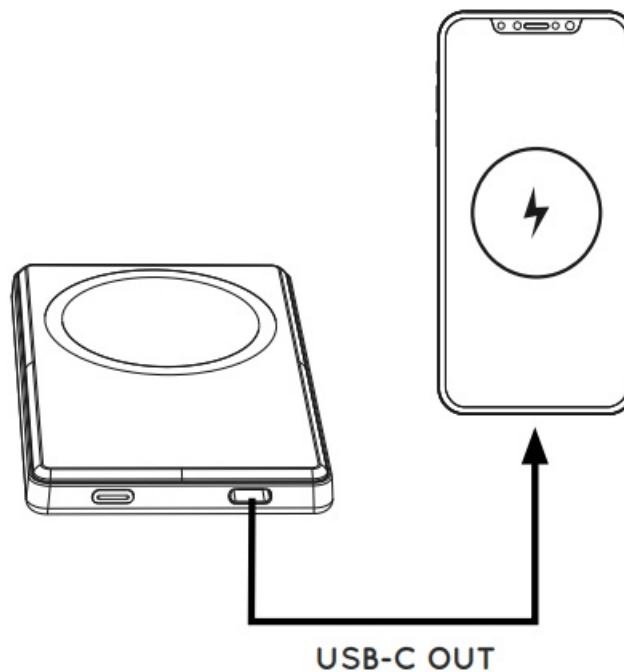

When the phone is placed in the wireless charging area, charging will start automatically. During wireless charging, the wireless indicator light remains on.

Note: If the room temperature exceeds approximately 26°C, the wireless charging efficiency may slow down once the iPhone reaches 80% due to Apple's battery protection feature

CHARGE YOUR DEVICES

The USB-C port supports QC and PD fast charging output. When connected to a mobile phone via the USB-C port, the phone can charge quickly. The four power lights indicate the battery level, with each light representing 25%. When the orange light is on, the device is in fast charging mode.

LED INDICATORS WARNING

- When the light flashes quickly, it indicates the presence of Metal FOD (Foreign Object Debris) on the surface or a malfunction. Please remove the device and any FOD immediately, then restart the product to resume use.
- When the product overheats, the NTC will activate overheat protection. All four power lights will flash, and charging will stop. To resume charging, remove the phone and wait for the temperature to decrease, then press the button to restart the charging function.

OUR WARRANTIES

PREMIUM QUALITY

We select the finest materials to ensure a high quality and durability for all of our products.

PROTECTION CIRCUIT

The Sunslice Power bank is equipped with a voltage stabilizing circuit to avoid damaging your devices.

2 YEARS WARRANTY

Power bank has a 2-year warranty. In case something goes wrong, please contact us directly by email at: service@sunslice-solar.com

Before contacting us, please have a look at our FAQ at: www.sunslice-solar.com/apps/help-center

PRECAUTIONS

- Generally, the full charge of the mobile phone is 3-4 hours. Please remove the mobile phone immediately after the mobile phone is full to avoid overheating, Please do not charge the phone continuously for days!
- Please try to align the phone with the surface dots to improve the charging efficiency. If the charge is unstable or not charging, adjust the phone position.
- If the phone case is too thick, please remove the case to increase the charging efficiency.
- It's normal for your device to get slightly warm during the inductive charging. It has an overheating protection function built-in.
- Do not place metal objects, magnetic cards, and metal phone cases on the charging pad, as this may cause damage or the charger may not work. Compatible with mast kinds of phone cover cases, including rubber cases, hybrid cases, plastic/TPU/PC cases, ect.
- Do not place the charger closely to the magnetic stripes or chip cards (ID cards, bank cards) to avoid magnetic failure.
- Make sure that the pad doesn't get too hot. If it does, take your phone away from the pad, and switch the charger off: when the plate has cooled down try charging again.
- Magnetic Charging Mode is compatible with all iPhone 15, 14, 13, and 12 models. For other mobile phones, a magnetic protective case is required for a good adhesion.
- You are welcome on our website to learn more about our products.
