SP530E LED Strip Controller

Brief:

SP530E is a versatile IoT LED controller designed specifically for controlling various types of LED. It utilizes a dual-mode (2.4GHz WiFi and Bluetooth LES.0) chip, enabling Bluetooth, WiFi, local network, or cloud connection via an App. It also supports RF remote control.

Furthermore, the SP530E has integrated with various smart home platforms, including Alexa, Google Home, Xiao Ai, and Xiao Du, allowing you to easily control your light through voice commands. SP530E offers limitless potential for lighting and ambiance needs, delivering a more intelligent, convenient, and personalized experience to you.

Features:

1. Supports multiple control methods, including App control, smart speaker voice command control, and 2.4G RF remote control, providing users with flexible control options.
2. All-new upgraded music effects, featuring multi-segment LED strip music effects and Matrix LED music spectrum effects.
 - Multi-segment LED strip music effects: Users can configure multiple segments of music effects on the same LED strip, each segment of the strip can feature different music effects, various pixel counts, and can be tailored to correspond with low, mid, or high audio frequency ranges.

- Matrix LED music spectrum effects: Users can flexibly configure the size and wiring layout of a LED matrix, can set parameters for the falling dots and sound columns, such as color palette, saturation, direction, etc. Offering users even more unique music spectrum effects.
 - Various music collection methods: Supports various music collection methods including phone microphone, player streaming, and onboard microphone.
3. Compatible with up to 12 different types of LED.
 4. Supports power on/off dynamic effects setting, timer settings, playful on/off triggering settings, and default power-on status setting.
 5. Supports OTA firmware upgrades, keeping the device in its optimal state.
 6. Integrated with “BanlanX®” Cloud for stable IoT smart home cloud connections.

APP:

<https://download.ledhue.com/page/scenex/>

1. SP530E supports App control for iOS and Android devices.
2. Apple devices require iOS 10.0 or higher, and Android devices require Android 4.4 or higher.
3. You can search “Banlanx” in App Store or Google Play to find the APP, or scan the QR code to download and install.

Operations

- Open the App, click the  icon in the top right corner of the home page to add device.
- Please set the LED type and calibrate the color order according to the page prompts, you can also change these settings on the settings page.
- Click the  icon in the upper right corner of the App to enter the settings page, where you can modify the name, modify the type of LED, calibrate the color order, set the timings, set the on/off effect, etc.

5. 2.4G Touch Remote Control :

SP530E can be used with 2.4G touch remote control and 2.4G touch 86-type panel; There are 4 kinds of remote control, 4 kinds of 86-type panel; different type of LED match different remote and panel models:

1CH PWM Single Color	2CH PWM CCT	3CH PWM RGB	4CH PWM RGBW	5CH PWM RGBCCT	SPI Single Color
					
SPI CCT	SPI RGB	SPI RGBW	SPI RGBCCT	SPI RGB +1CH PWM	SPI RGB +2CH PWM CCT
