SuperInk SF20R 1 Set Motion Sensor Doorbell Instructions

Wireless Welcome Doorbell
Motion Sensor Alarm / Chime / Alert
SF2OR (Receiver) WLS1 0 (Infrared Curtain)

Contents

Instructions

Features

- Shop Keeper in day time, anti-thief in the night, welcome / doorbell /alarm / color lights / lighting 5inl multi-function.
- Remote transmission range up to 280M /918ft in the open space.
- 8 channel music chip, 40mm big horn, 36 chime melodies, remember your last set melody and volume level once powered off.
- Colorful LED lights, adjustable brightness, distinguish multiple entrances by different colors.
- 4 stages adjustable volume (Loud/High/Middle/Low) from 113-25dB.
- The receiver can learn from up to 32 wireless sensors like PIR motion, magnetic or vibration sensors as well as up to 8 remote controllers.

280 meters
Application: shops, Commercial Complexes, Luxury hotels, offices, factories, homes, villas, driveways, walking paths, Supermarkets, restaurants, etc.

Five functions | 8-ch chip | Double power supply | Color light subarea | 280 meters | 113dB alarm
FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF exposure guidelines, This equipment should be installed and operated with a minimum distance of 20cm from the radiator of your body: Use only the supplied antenna.

Function Description

2.1 Batteries and Power

2.1.1 3*AAA alkaline batteries for PIR Transmitter, 3*AA for Receiver, please note the negative and positive.

2.1.2 You will hear a short "DUftand see LED colorful lights flashing after loading the batteries for the receiver. Load the batteries, turn on the transmitter, and the LED indicator will be on for 5 seconds.

2.1.3 Alkaline batteries are recommended, other types will shorten standby time and lower the alarm volume. Micro USB is an alternative for power supply; battery supply will be automatically cut off if AC power and can be standby power supply if power is off.

2.2 Installation

2.2.1 Install the transmitter in the ceiling or aisle of the entrance where customers and intruders go back and forth. Installation by screws will be more firm than a double-sided tap which requires a tidy and smooth surface.

* The transmitter detects the infrared signal range released from body surface temperature of 341: please take the 1.3 (Figure 4) for installation adjustment reference.

* The transmitter is used indoors only; please do not keep it exposed to the sun and rain. Had better not install it in the areas of the air-conditional, fan which changes the environment temperature.
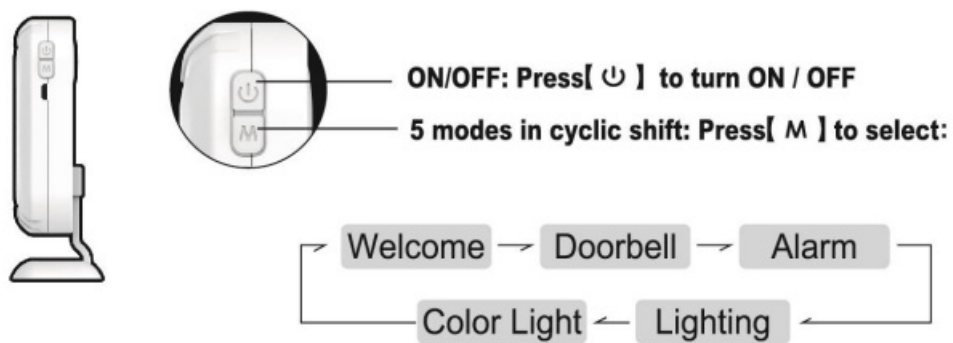

2.2.2 Place the receiver with the desktop base on the desk, or fix It on the wall with the screws.

2.2.3 After installation, press the receiver ON/OFF button to enter into welcome reminder mode, test the wireless transmission distance, and adjust the angle of the transmitter. Try to ensure that the people who come in from different positions can be detected by repeating tests.

2.3 Operational Description:

2.3.1 The transmitter and receiver have been programmed in the factory.

Figure 5
