⚠ Please match the polarity when installing the batteries. Incorrect polarity can cause malfunction of the device, which gives no claims for warranty servicing.

⚠ It is necessary to always install only the same type of batteries, because installation of different types of batteries with different levels of charging can cause leaking of one of the batteries, which can damage the device.

CONNECTION

- Connect the 2.4 GHz USB nano receiver to a free USB port of your PC.
- To activate the set, press any button of the mouse or turn the scroll wheel. If the connection is correct, the set will turn on automatically.
- After finishing your work, you can pull out the receiver from the PC USB port and insert it into the mouse as shown in Fig. 4.
- If the mouse or keyboard don't work, connect them to the nano receiver again.

Fig. 5

Notes:

- Do not place the receiver into a confined metal space (table drawer, box, safe), as a metal screen does not transmit radio signals.
- If batteries run down, there are «lapses» in operation of the mouse or keyboard. In such a case replace the batteries with new ones.
- If there is a long pause in operation of the mouse or keyboard, they enter the Sleep mode. To enter the working mode just press any button.

TROUBLESHOOTING

Problem	Solution
The keyboard/mouse is not working.	1. Check whether the batteries have been installed correctly. If necessary, replace the batteries with new ones matching the polarity. 2. Pull out the USB receiver and insert it back, make sure that it is not damaged. 3. We recommend that you address your nearest service center.

If none of the above methods can solve the problem, please seek professional advice at your nearest service center. Never attempt to repair the product yourself.
