The IP-CAM350 is a 360° 5MP IP Camera designed for indoor use. The camera has built in PoE, H265 and H264 codec, speaker and microphone.

Powering the camera

Option 1 – Power the camera from 12V DC (via the 2.1mm DC Socket), the current consumption is 290mA. The camera is polarity sensitive so connections must be made correctly.

Option 2 – Power the camera using a PoE 48V RJ45 Socket

When connecting to a ZIP PoE NVR plug the camera directly into the NVRs built in PoE switch.

The camera should automatically become visible after being connected for approximately 1 minute.
