tado V3+ Smart AC Control

Install the Smart AC Control

Good to know

The Smart AC Control works with most air conditioners with a remote control that displays the air conditioner's current settings.

Our highly-trained Technical Support team is happy to help if you face any issues during the installation.

Steps

Register the device

1. Your tado° app guides you through the registration of your device.

Connect to Wi-Fi

1. Connect your Smart AC Control to the Internet using your smartphone.

Set up and test with AC

1. Point your AC remote towards the Smart AC Control and press the On/Off button. When completed, you can test by setting different commands through the app and see how your AC reacts.

Position the device

1. The tado° Smart AC Control can be mounted on a wall or placed on a table.

Documents / Resources

 <p>The thumbnail shows the cover of the instruction manual for the tado° V3+ Smart AC Control. It features the tado° logo at the top right and the title 'Install the Smart AC Control' at the top left. Below the title, there are four numbered steps with corresponding images: 1. Plug the power cord into the back of the device. 2. Plug the power cord into the wall outlet. 3. Plug the power cord into the wall outlet. 4. Plug the power cord into the wall outlet.</p>	<p>tado V3+ Smart AC Control [pdf] Instruction Manual V3, Smart AC Control, V3 Smart AC Control</p>
