TAFFIO JP-X Series Automobile Intelligent Video Navigation System

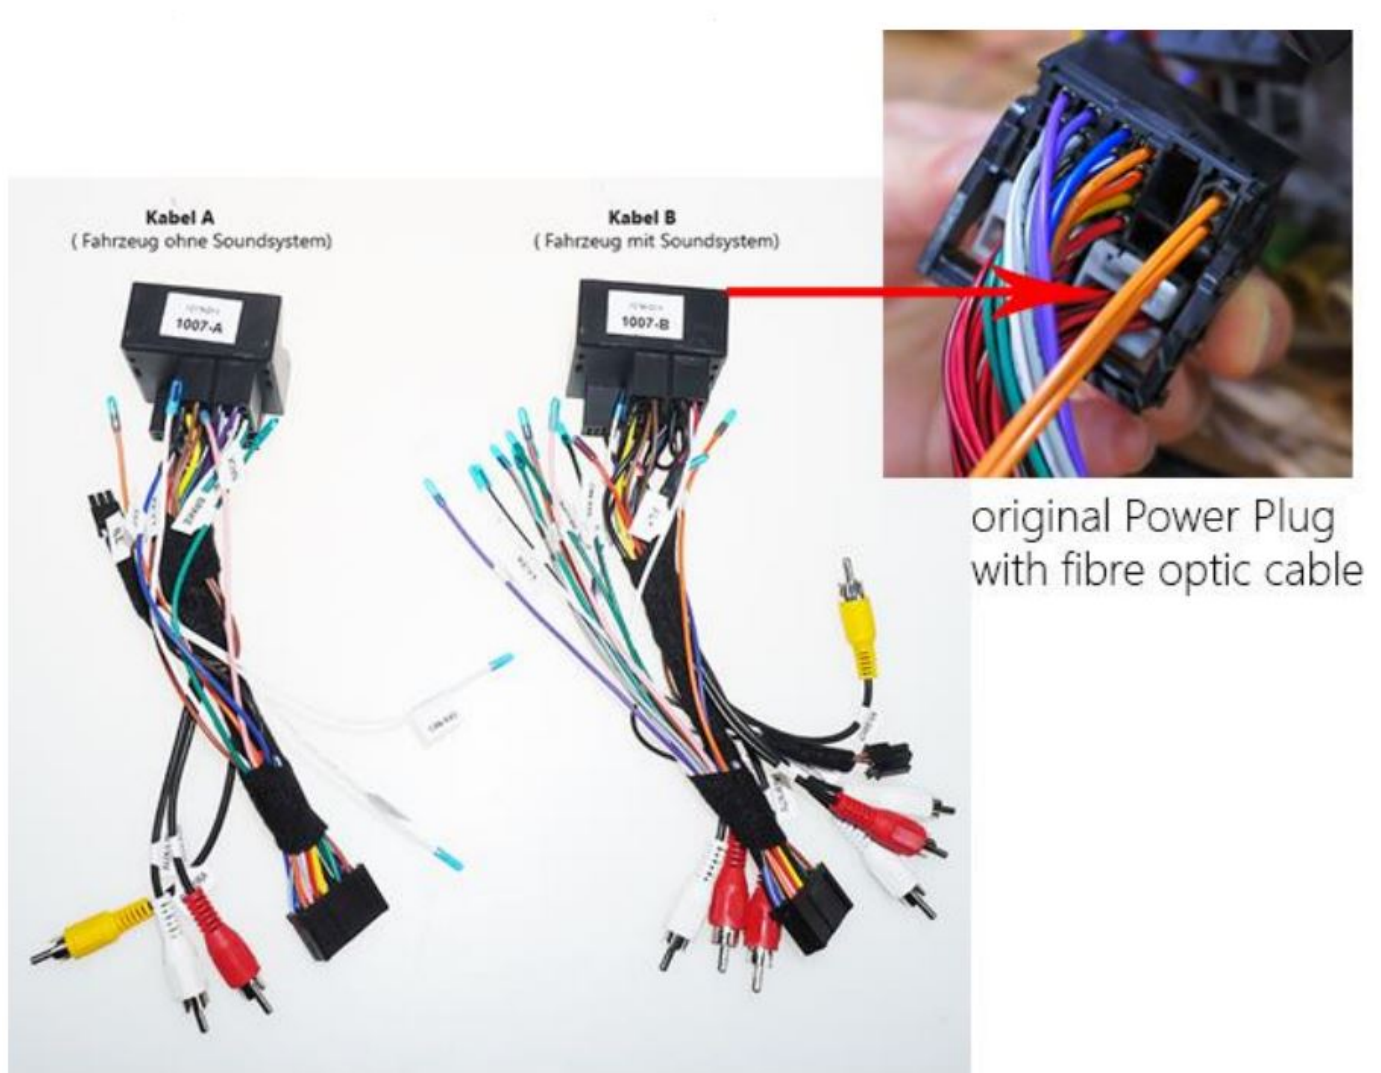

Product Usage Instructions

1. **Power Cable Option:** Use Cable A if the vehicle does not have a sound system and Cable B if it does.
2. **Fibre Optic Cable:** Connect the fibre optic cable for proper data transfer and communication between different vehicle components.

3. **Canbus Connector:** Ensure that the Canbus Connector is plugged in correctly by referring to the picture in the user manual.
4. **Rear Camera Connection:** Connect a rear camera to the product for better visibility while reversing the vehicle.
5. **USB Connector:** Choose between the two options – either use the Android USB cable or use the USB adapter to continue using the original USB socket.
6. **Sound Settings:** Access the sound settings by going to System > Factory Settings and entering the code 7890. Scroll down to the end and select “Original with AMP”.

INSTALLATION

POWER CABLE OPTION

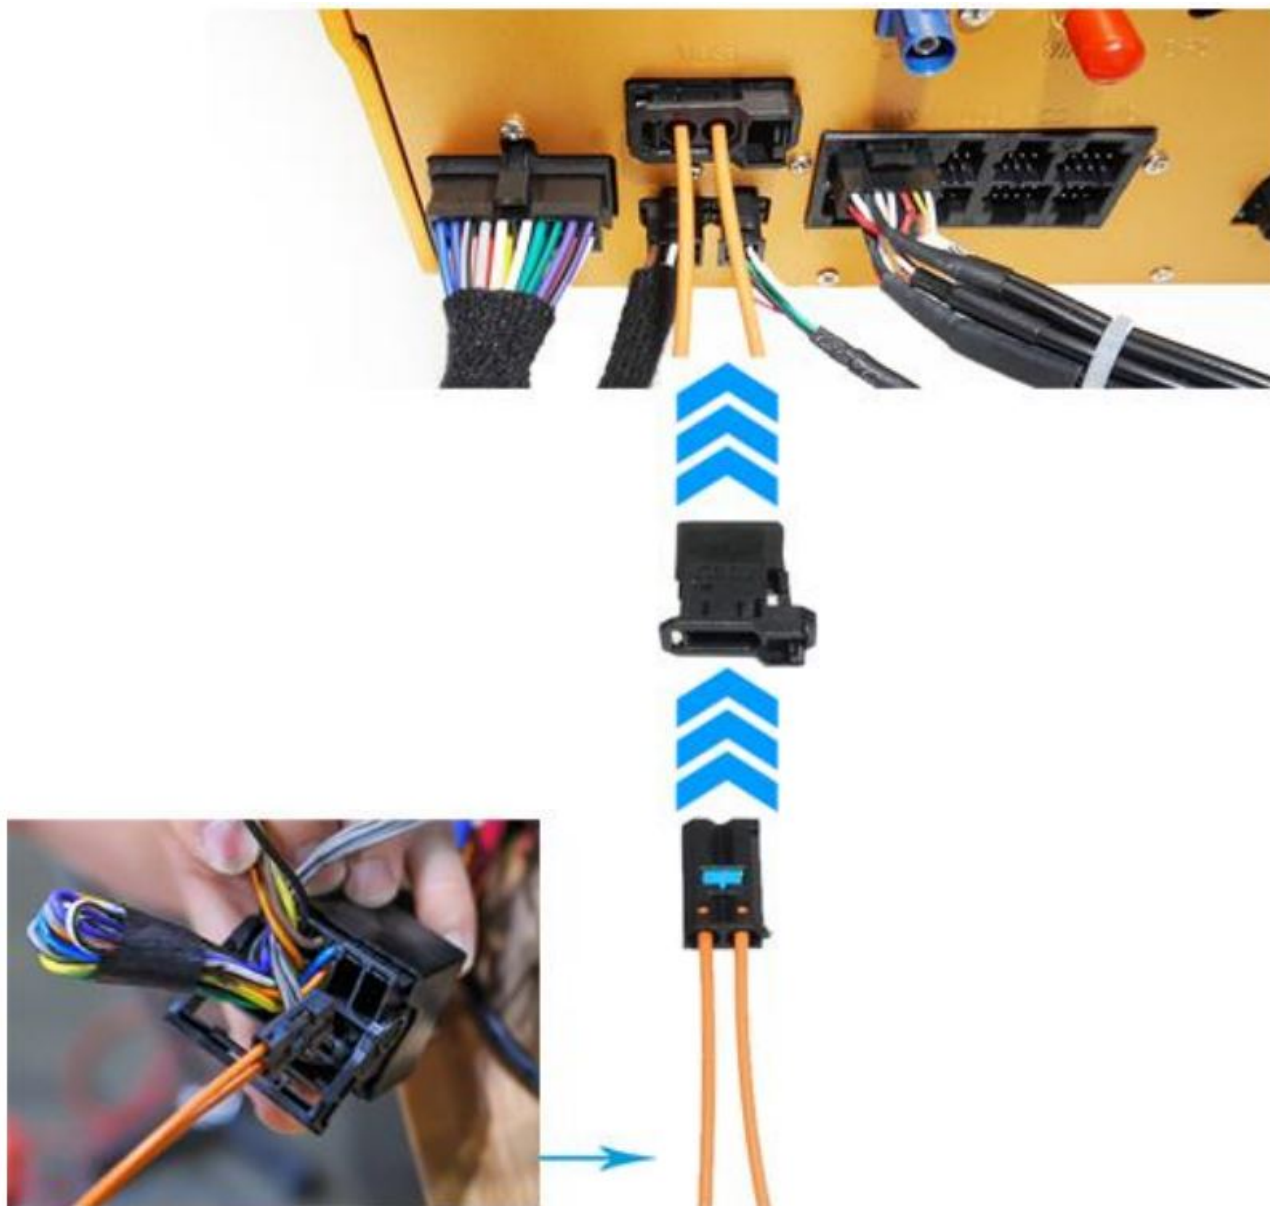

- Car without Soundsystem > Cable A
- Car with Soundsystem > Cable

Connection Cable A (Car without Soundsystem)
