CYCLE MODES

Warm Tips

- For the first use, please fully charge the night light.
- Don't install the light next to the router.
- Do not install the light in a humid or high temperature place.
- The night light will only light up when motion is detected in the dark or in low light.
- Please do not install the 2 lights too close. If one light is on, the other light may not turn on.

Installation Steps

- **STEP 1:** Press the magnet piece behind the light lightly for more than 5s.

- **STEP 2:** Tear off the adhesive paper on the iron sheet.
- **STEP 3:** Press the iron sheet firmly on the wall.
- **STEP 4:** Attach the lamp to the iron sheet.
