MIF-WX Sub miniature Condenser Microphone

The MIF-WF is a sub-miniature condenser microphone with noise suppression function and omnidirectional pattern. TAP microphone is designed for use on musical instruments and provides clear and accurate experience to the user. It is suitable for vocal or video recording, indoors and outdoors. The microphone is equipped with shielded cable (Kevlar material) that provides high tensile strength, hugely reducing the cable damage through bending and twisting.

Low-profile design (only 5mm diameter) is ideal for applications requiring minimum visibility. The microphone cover are sturdy and fashionable (hard bronze element) with smooth surface and wear proof texture. Comes with high-quality mini XLR connector that provide safe connections. Extra long 1.2 M cable is perfect in every playing position, giving the user flexibility and the range as needed. Required 48V phantom power for working. Offered with 3.5 m length cable, that has an output XLR (with inside phantom power supply) and mini XLR input (with mount belt clip) to connect in-line with your microphone.

The clip on XLR secures the cable permanently on the belt.

Matching perfect with wireless systems.

Specifications

Sensitivity: -30dB \pm 3dB

Directivity: Omnidirectional

Impedance: \leq 3 K Ω

Operating voltage: 2-5v (48V)

Frequency response: 70Hz-18KHz
