## FEATURES

Active, professional Accordion system.

( 4 + 1 ) condenser microphones reproduce a natural sound all over instrument's melodies.

TAP Active, Microphones system is the most advanced for Accordion with great performance and exceptional response.

The system consists of 2 discreet units, "NET" for the treble (melodies) section and the "NET-B" for the bass section.

Covered by filter technology, that eliminates the feedbacks and mechanical noise.

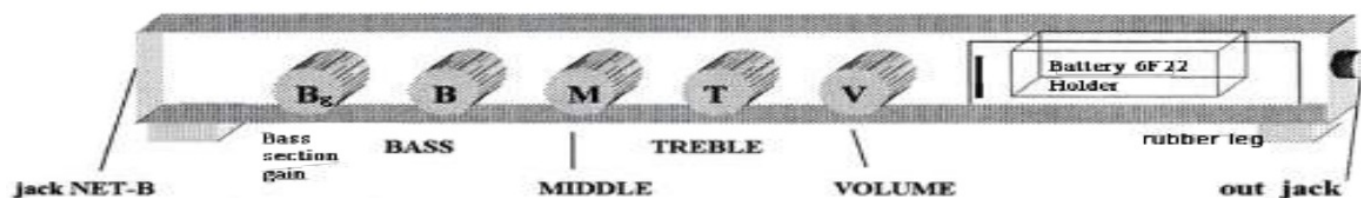

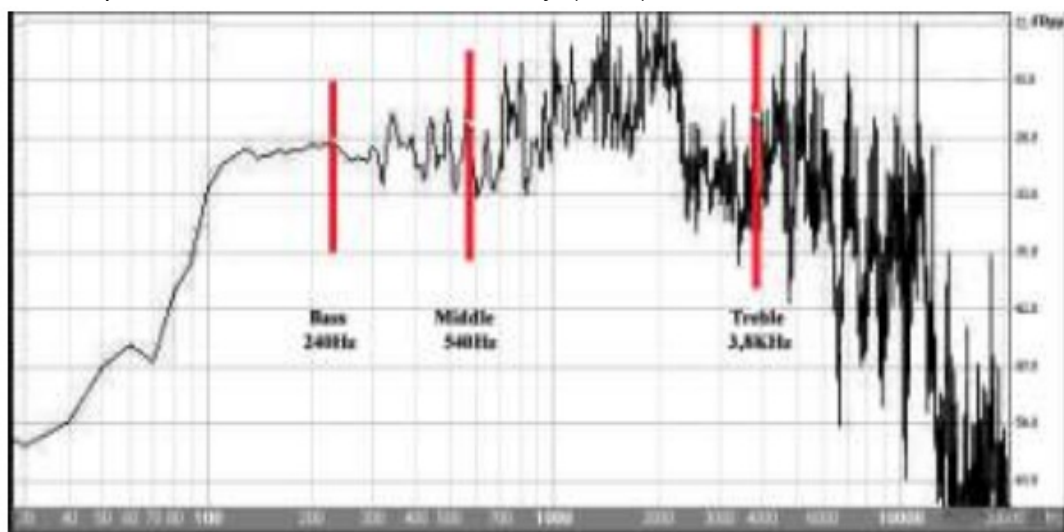

A build-in powerful SMD-low consumption preamp is used, for perfect results.

That provide high output signal and excellent matching to all amplifiers and consoles.

Controls for bass, medium and treble, along with a volume control and gain for bass section, declare flexibility for an ideal performance.

Comes with 1/4 output jack and mini jack (3.5 mm) input for bass section.

The unit powered with a 9 Volt Alkaline battery. (6F22).

## INSTALLATION

The section for the treble, installs easily over the accordion's front surface panel.

The system secures on the accordion with 2 elastic round-strap brackets , that mounts on the sides.

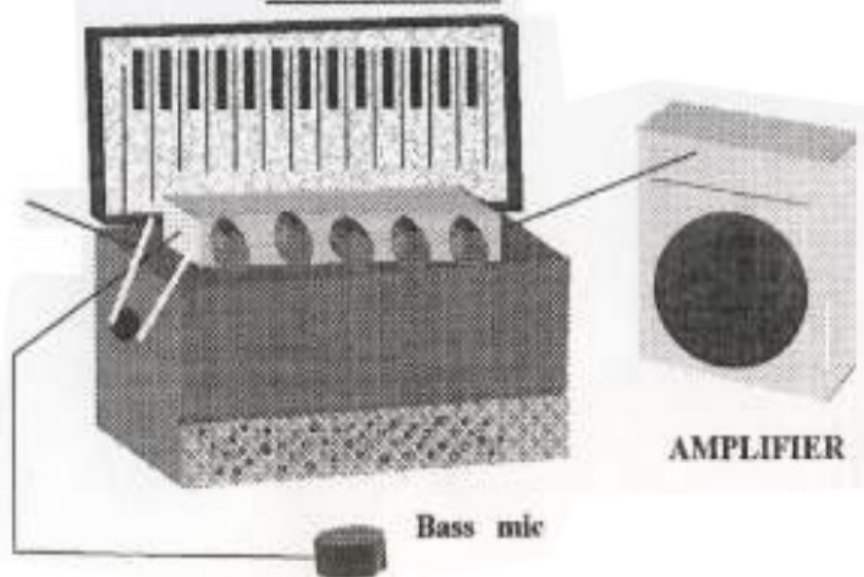

The rubber plate legs, avoids scratching on the accordion surface.

The NET-B mounts over the bass holes, with special "Velcro" tape, and connect to appropriate input (3.5 mm).
