# Targetever

**Targetever IG01A Wireless Game Controller**

**Product Usage Instructions**

**Wireless Connection Switch Platform**

**Please Note:** Ensure the AIRPLANE mode of the console is turned off before use.

## **First-Time Pairing**

1. From the HOME menu of the console, select Controllers, then Change Grip/Order.
2. Press and hold the Home button on the bottom of the controller for at least five seconds to power on the controller until all 4 LEDs flash. Once paired, the LED will remain lit, and the controller will be shown on the screen.

## **Wake Up and Reconnect**

### **Once paired**

- If the console is in SLEEP mode, the HOME button of the controller can wake up both the controller and the console.
- If the console is on, all buttons can wake up the controller, and it will reconnect to the console.

### **If unable to connect**

1. Turn off AIRPLANE mode on the console.
2. Remove the controller's information on the NS console (System Setting > Controllers and Sensors > Disconnect Controllers).
3. Follow the First-Time Pairing steps.

## **FAQ**

- **Q:** How can I adjust vibration intensity?
- **A:** You can adjust vibration intensity by navigating to Settings Controllers and Sensors > Vibration Settings and selecting your preferred level (None, Weak, Medium, Strong).
- **Q:** How do I test and check the Turbo settings on a console?
- **A:** To test Turbo settings, go to Settings > Controllers and Sensors > Test Input Devices > Test Controller Buttons and follow the on-screen instructions.

## **OVERVIEW**

## Specification

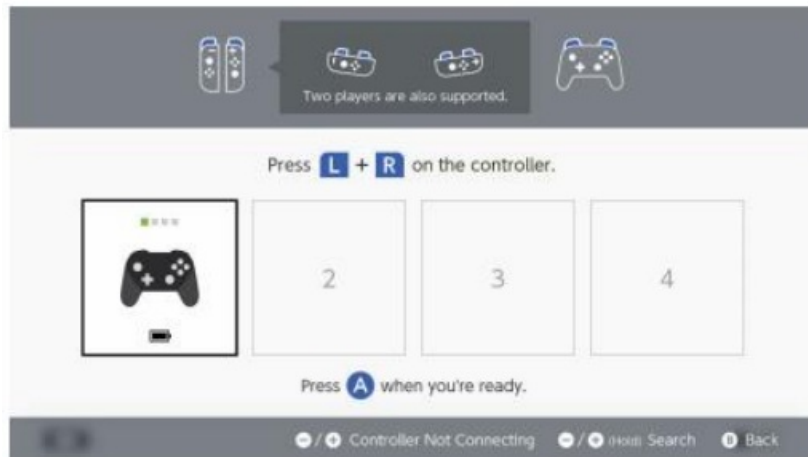

- **Input Voltage:** 5V, 350mA
- **Working Voltage:** 3.7V
- **Battery Capacity:** 600mAh
- **Product Size:** 155.5\*103.7\*59.8mm
- **Weight:** 180 10g
- **Material:** ABS

## Wireless Connection

### Switch Platform

**Please Note:** Please make sure the AIRPLANE mode of the console is turned off before starting to use it. First-Time Pairing:

1. From the HOME menu of the console, select Controllers, then Change Grip/Order.
2. Press and hold the "Home" button on the bottom of the controller for at least five seconds to power on the controller until all 4 LEDs flash. Once paired, the LED will remain lit, and the controller will be shown on the screen.

## Wake Up and Reconnect

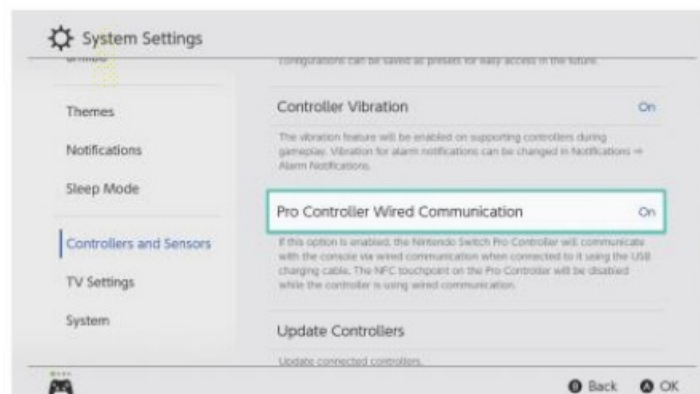

- Once the controller has paired with the console:
- If the console is in SLEEP mode, the “HOME” button of the controller is able to wake up both the controller and the console. -If the console is on, all the buttons are able to wake up the controller, the controller will reconnect to the console.

## If unable to connect, please follow the three steps:

1. Turn off the AI RPLANE mode on the console
2. Remove the controller's information on the NS console (System Setting > Controllers and Sensors > Disconnect Controllers)
3. Follow the First Time Pairing steps

## Controller Auto Sleep

1. In the wireless connection, press and hold the HOME button for 3 seconds, the controller will be disconnected and turn into sleep mode.
2. If no button is pressed within 5 minutes, the controller will automatically sleep.
3. The controller sleeps when the controller is in SLEEP mode.

4. Set the Switch console on the Dock for the TV mode. Connect the Switch Dock and the controller directly with the USB Type C to A cable.
5. Press HOME button > Controllers > Change Grip/Order. The controller icon with the USB” displayed on the screen indicates the wired connection is successful.

### Please Note

- When using the wireless controller for the first time, it is recommended to have both the Controller Sticks and Motion Controls calibrated before usage.
- If the calibration fails, please press the Y button to restore the settings and press the X button to repeat the calibration steps. Power off the controller once the calibration is finished, then restart the controller and console.

## FCC STATEMENT

### FCC Caution

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
  2. this device must accept any interference received, including interference that may cause undesired operation.
- Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure conditions without restriction.
