Watch Delays at Work

Tom and Laura invite you to jump into the Echo universe with this introduction to the power of Tap Delay in Beyoncé's "If I Were a Boy."

Enter the Echo Universe

VOICETONE E1 offers singers the signature echo and slapback effects that evoke classic songs, while putting effects control at their feet. High quality, immersive echo effects for the stage are no longer just for guitarists.

Packed with Vintage to Modern Features

Not only are there 13 different echo and delay types, but you can control the length of repeats, set the echo times to your song's tempo, turn on the analog button for a vintage feel or jump into the future with special effects to dramatically twist your tune.

It's Just this Simple...

- Plug in your mic, plug your pedal into the mixer & set the gain
- Turn on the effect
- (That's it)

Of course, you can always change the style or the amount of correction, but you shouldn't need the manual - unless you're making a fire!

Chain It

You can chain VOICETONE E1 to all of the other VOICETONE singles, mixing and matching effects to define your personal sound. It also works with DITTO MIC LOOPER, the pure looping pedal for singers and instrumentalists. Use the Singles Connect Kit (available separately) to mix and match up to 4 TC HELICON vocal effect pedals together conveniently, simply and with less cable clutter than ever before

Under The Hood

Beneath VOICETONE E1's sturdy, die-cast metal case, you'll be getting the same quality processing you've come to expect from our flagship VoiceLive® vocal processors. You'll also find a clean, quiet mic preamp that rivals high-end touring mixers, plus studio-quality analog to digital conversion. There's even a USB connection for firmware updates.

Signature Echoes & Slapbacks

1. 13 wicked delay styles including slapback/flutter echoes, non-tempo matched echoes, timed echo styles and special FX echoes
2. Control the length of your repeats and precisely control echo level
3. Analog button for softer echo sound from the days of tape recording
4. Footswitch tapping matches echo repeats to your song's tempo

More Mic, More Control

You can completely control VOICETONE E1 from your mic simply plug in a TC HELICON MP-75 microphone or Sennheiser e835 FX (both sold separately). We call it Mic Control™, and it allows you to command both the stage and the audience!

You Are Covered

We always strive to provide the best possible Customer Experience. Our products are made in our own **MUSIC** Tribe factory using state-of-the-art automation, enhanced production workflows and quality assurance labs with the most sophisticated test equipment available in the world. As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a generous **Warranty program**.
