TDE Instruments Digalox DPM72-AV2 USB Interface

Safety instructions

- Read instruction manual carefully before operating the device! Keep for later reference.
- Mounting and installation must be carried out by suitably qualified and competent persons only.
- **WARNING:** When working on the device hazardous voltages must not be connected to the device!
- **DANGER:** When the USB port is connected, only voltages lower than 50 V may be applied to the measurement inputs. The USB port is not isolated from the measurement circuit.

Intended use

- Configuration of Digalox® DPM72-AV2 or DPM36
- Indoor use non condensing, non corrosive.
- Failure to comply with these instructions will void all guarantee and warranty.

Description

The USB interface is used to connect a Digalox® DPM72-AV2 or DPM36 to a PC. Using the corresponding configuration software “Digalox® Manager”, the device can be configured. Visit www.digalox.com to download the software “Digalox® Manager”.

Product overview

1. USB Micro-B interface
2. Pins to connect to DPM72-AV2 or DPM36

Mounting onto DPM72-AV2

Plug the USB interface card into the position marked “USB EX2” on the circuit board of the Digalox® DPM72-AV2. Make sure that all pins of the card are plugged into the socket. A USB cable with a USB Micro-B plug is required to connect to the PC.
