TEBLEI ICE Cube Tray

OVERVIEW

PRODUCT MANUAL

STEPS TO USE

Fill Water

Fill ice cube trays with water or anything you like. Please do not overfill it with water or it'll be a little hard to remove the ice cubes. We recommend filling the water not beyond the max indicated line.

Put in the Freezer

Put in the freezer for more than 10 hours until completely frozen. If you add various foods such as fruits, it will take 12 hours or more. The complete frozen time depends on your freezer power.

Press the Lid

Installing the press plate on the lid. Put the tray on the ice bin upside down and press the lid on it to pop out all the ice cubes. We recommend waiting 1 min to easily release when the ice cubes melt a bit.

Rinse with water

Please Rinse with water after use. Please do not put all the parts into the dishwasher for cleaning. High temperatures may cause deformation or damage.

EXCELLENT DESIGN

ATTENTION

- For thick substances such as for milk and yogurt, please wait five minutes before releasing them due to their stickiness.
- Please do not use sharp items such as wire balls to avoid scratching products. Wipe with a wet cloth or soft item.

PRODUCT DETAILS

- Product: Ice Cube Tray
- Color: Green/Blue/Yellow
- Temperature Limits: -4°F~140°F(-20° ~60° C)
- Material: PP/PET/ABS/Food Silicone
- Weight: 1.5 pounds
- Size: 10.24"D x 5.51"W x 6.3"H
- Region of Origin: Made in China
- Manufacturer: Teblei Technology Co., Ltd
