Wireless Pairing:

1. Power on speaker the blue LED will blink, go to wireless setting on your device, find A1 and select to pair.

Micro SD Mode:

1. Max support reading 64GB Micro SD card.
2. Insert any Micro SD card, the speaker will play the audio files in the Micro SD card automatically.
3. If the wireless of the mobile phone has been connected to the A1" speaker box, press the "on/off" button to switch TF card to play

What is TWS?

TWS means "True Wireless Stereo". The technology enables two wireless speakers to be paired and to perform stereo music. How to pair your device?

1. Turn on both A1 speakers (if any of the two A1 is connected, disconnect the speakers first from the Bluetooth device, ex: your phone).
2. Quickly double-click the "Power" button on one of the A1. A voice prompt will indicate it has entered pairing mode.
3. When pairing is successful, a voice prompt will be played.
4. Turn on the Bluetooth function on your device (for example: your phone). It will search for and find a Bluetooth device named A1. Connect to it.
5. Play music to enjoy wireless stereo music.
6. Once TWS pairing is successfully done, the speakers will automatically pair via TWS every time they are turned on. There is no need to repeat above mentioned steps.
7. If the speakers have previously been paired via TWS, it is recommended to press and hold the "M" button for 5 seconds (to restore factory settings) and restart the speakers before going through above steps to successfully

pair via TWS.

8. When the speakers are paired via TWS, only the “master” speaker will play sound during phone calls.

Friendly Reminder:

Due to the powerful output of this speaker, do not listen too close to the speaker. Please maintain an appropriate distance while listening! To avoid discomfort from excessive volume, please use an appropriate volume level when enjoying your favorite music!

FCC Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential

installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

RF exposure warning:

This equipment complies with radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with Minimum distance 20cm between the radiator and your body.
