Product documentation

The following user documentation is available for your product. See the TMT4 Help for detailed information on how to use these accessories.

These and other user documents are available for download from www.tek.com. Other information, such as demonstration guides, technical briefs, and application notes, can also be found at www.tek.com.

| Document | Content |
|---|--|
| Installation and Safety Instructions | Safety, compliance, and basic connection and turn on information. Multilingual document. |
| Help | In-depth operating information for the product. Available from the Help button in the product UI and as a downloadable PDF on www.tek.com . |
| User Manual | In-depth operating information for the product. |
| Specifications and Performance Verification Technical Reference | Instrument specifications and performance verification instructions for testing instrument performance. |
| API Programming | API commands for remotely controlling the instrument. Accessible from the instrument application online. |
| Declassification and Security Instructions | Information about the location of memory in the instrument. Instructions for declassifying and sanitizing the instrument. |
| Service Manual | Replaceable parts list, theory of operations, and repair and replace procedures for servicing an instrument. |

How to find your product documentation

1. Go to www.tek.com.
2. Click Download in the green sidebar on the right side of the screen.
3. Select Manuals as the Download Type, enter your product model, and click Search.
