Vente/Odottaa/
Warten/Vent/Poczekaj
10 min*

Please note: The Z-Wave mesh network-routing is updated automatically. It is normally done within 10 minutes but can take up to 24 hours. In order to update the routing of battery powered Z-Wave devices they need to be awake. Please refer to the user manual of your device in order to wake it up. Depending on the device it can take several updates before it discovers the new route.
