## CloudView Test Teltonika Telematics Software Application

## INSTRUCTION MANUAL

### CloudView Test Instruction

#### Introduction

CloudView- is Teltonika Telematics software application for testing of our video solution.

#### 1. Create an account

To create account, go to page <https://cloudview.teltonika.lt/> and pres “Sign in with Teltonika SSO”, and follow the steps.

**Logins will be same as you have for FOTA WEB.**

Login

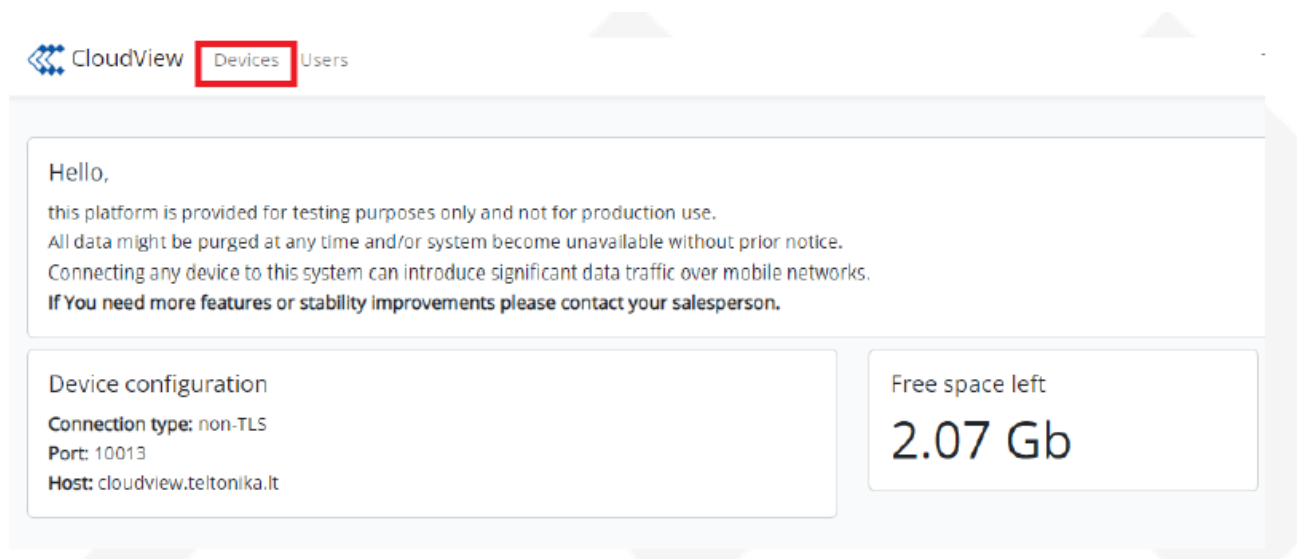

Email

Password

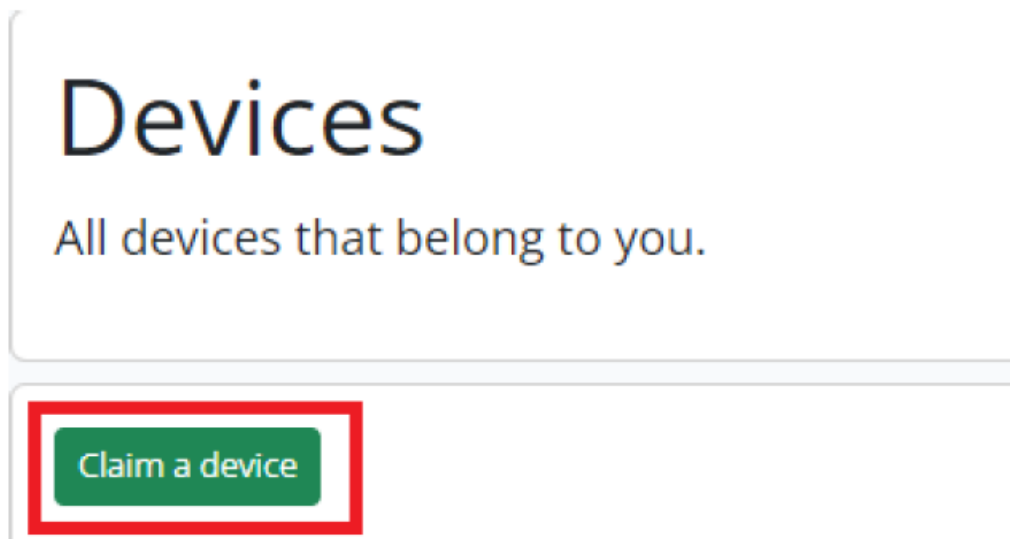

Login

#### 2. Device adding to system.

After logging in to the system select “Devices” tab:

Then select “**Claim a device**” button:

Service will prompt you to enter device IMEI, description (might be useful to locate device faster if there several of them added). After that, press “**Add device**” and device will be shown in main screen.

## Add device

Please enter device IMEI and description.

IMEI **1**

770000000000000

Description **2**

Add device

**3**

After device was added, following information will be displayed: IMEI, description, when device was created, how

many files were received.

#### Additional information:

**Logs** – here you can see the LOG information, related to device-server communication, this mainly used by developers for analysis if there are any issues.

**Files** – view all photo/video files that were received. Files can also be downloaded to the computer.

**Edit** – device IMEI and description can be modified here.

**Delete** – to delete device.

IMEI	Description	Created at	Created by	Last media at	Logs	Files		
XXXXXXXXXXXX	FMX125 DualCam	2023-07-20 10:10:10	XXXXXXXXXXXX	XXXXXXXXXXXX	823	6	Edit	Delete

### 3. Device configuration

FM device needs to be set up to send photo/video files to Elise server. To do that, installation of correct firmware must be performed on FMX125/FMX225 or FMX6 Series, depending on used camera: ADAS, DSM or DualCam. Open configuration and locate camera settings in RS232 and enter domain and port: Domain and port can be found in Elise page.

Hello,

this platform is provided for testing purposes only and not for production use.

All data might be purged at any time and/or system become unavailable without prior notice.

Connecting any device to this system can introduce significant data traffic over mobile networks.

**If You need more features or stability improvements please contact your salesperson.**

#### Device configuration

Connection type: non-TLS

Port: 10013

Host: cloudview.teltonika.lt

### 4. Credits

If there are any further questions/issues with connection of the DSM and FMX6 Series device, please contact your direct sales representative OR create a VIP Helpdesk query where a technical support member will be assigned to you.

After completion of the testing, please provide feedback to your direct sales representative, we would appreciate your contribution to improving our services and quality of provided information
