Reset	Press and hold for 5 seconds to reset the camera (if you have modified settings, they will return to factory defaults)
Reset	Press and hold for 5 seconds to reset the camera

INSTALL

1. Use the included mounting bracket to fix the camera to a clean surface.

2. Or, put the camera on a flat surface.

CONNECT

DOWNLOAD

Tesla Smart is available for both iOS and Android OS. Search the name 'Tesla Smart' in App Store or Android Market, or scan the QR-Code to download the App.

SET UP ROUTER

The router supports the 2.4GHz WiFi (doesn't support the 5GHz), and is connected to the WiFi network. Please set the parameters of the router before connecting the WiFi network, and record the SSID and password of your WiFi. Please keep network available

REGISTRATION PROCESS

Step 1 Open the Tesla Smart App, click „Register“, read the „Privacy Policy“ and click „Agree“ .

Step 2 Input a legal and valid Mobile number or Email address and click „Continue“. Input Verification Code, then log in the app.

CONFIGURATION VIA BLUETOOTH INTERFACE

Open the app and select „add device“ at the top right. You will automatically see the camera in the search for nearby devices.

2. Then simply add the camera

3. If you have a problem connecting, scan the QR code below in the app and go through the process of restarting and re-pairing in the app

<https://smartapp.teslasmart.com/s/p?p=qt4rzqjltfhlp2kr>

FAQ

Q: The device cannot be previewed properly?

A: Check whether the network is normal, you can place the camera close to the router, and if not, it is recommended to reset the device and add it again.

Q: Why is it still in the list of devices after resetting?

A: The reset device only resets the network configuration of the camera, but cannot change the configuration on the App, remove the camera, and must be deleted by the App.

Q: How to cut the camera network to another router?

A: First remove and reset the device on the App and then configure the device again by the App.

Q: Why doesn't the device identify the SD card?

A: It is recommended to plug in SD card after power cut. Confirm whether the SD card is normally available and the format is FAT32. And the TF card can't be identified when the internet environment is not good.

Q: Why I can't get the notifications with my cell phone App?

A: Please confirm that the App has been running on the phone, and the relevant reminder function has been opened; Message notification and authority confirmation in the mobile phone system have been opened.

Question: I want to donate/sell my camera - what do I need to do?

Remove the camera from your account and wait for the camera to restart.

FUNCTIONS

Pan/Tilt

Rotate your camera by sliding on your smartphone, providing you with 360 degrees of vision.

Video flip

Flip your video stream up or down for maximum flexibility.

Motion detection

Built-in motion sensors detect movement, and the camera will send you push notifications and app alerts.

Record

Support 24H continuous recording with high capacity SD storage or Cloud storage.

Setting preset points

You can save these points as a view of a given situation. The practical use here is for smart scenes. You can then set the camera to turn to a point you specify at a certain time (e.g. when you enter a room) or when a light bulb turns on or a sensor switches on.

Day & Night

Never miss a moment, even in complete darkness, with powerful night-vision technology.
