THINKSCAN

THINKCAR THINKSCAN Plus S7 Touchscreen OBD2 Scanner

Product Information

THINKSCAN

THINKSCAN is a diagnostic tool that helps in checking the performance of the car systems. It is equipped with various features such as live data streaming, fault code reading, and resetting functionality for various car systems.

Features

- Live data streaming
- Fault code reading
- Resetting functionality for various car systems
- Compatible with Windows XP, 7, 8, and 10
- Multi-language support

Usage Instructions

1. Visit <http://www.mythinkcar.com> and download the update tool
2. Install the update tool on a computer running Windows XP, 7, 8, or 10
3. Write down the serial number and registration code
4. Take out the TF card located at the top of the device and insert it into a card reader
5. Insert the card reader into the computer and launch the installation tool
6. Select TF upgrade mode and click OK
7. Check whether the SN number is consistent with the SN number of the machine, if they are consistent, click Device upgrade
8. Enter the required E-mail address and Register Code, click [Submit] to finish the sign-up process.

9. Select the latest version of the software and click download
10. Reinsert the memory card into THINKSCAN and start the update process

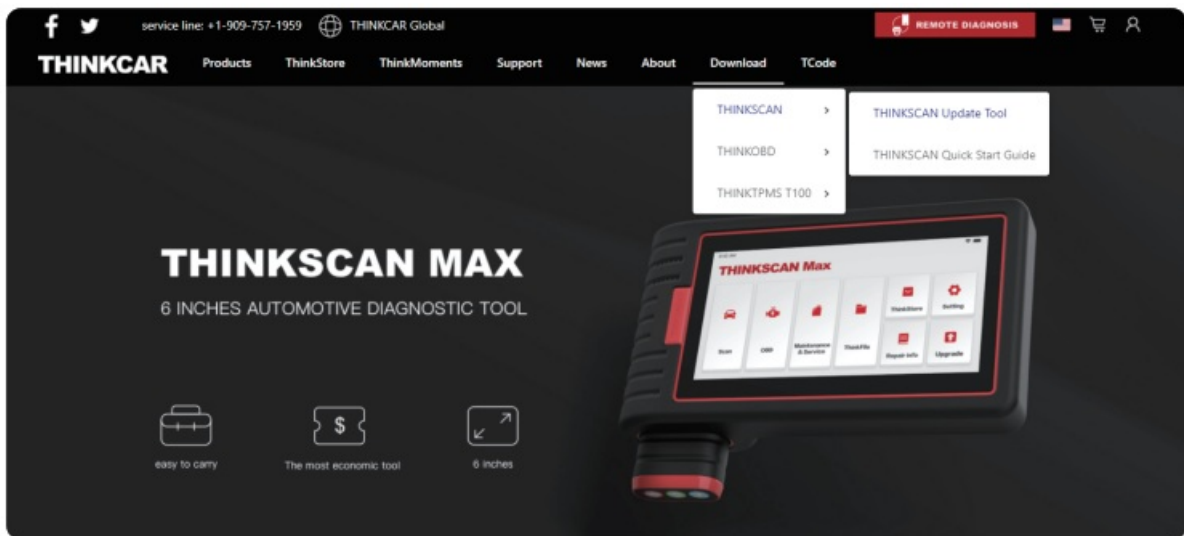

Note: For initial use, users need to go through a registration process. Once completed, the registration screen will not appear again each time you click the [Device Upgrade] button in the future. In case of any issues or queries, contact Online Customers Service via the order interface or reach out to the Customer Service Email support@mythinkcar.com for assistance. Products tutorial, videos, FAQ, and coverage list are also available on the THINKCAR official website.

Register & Update

Prerequisite conditions

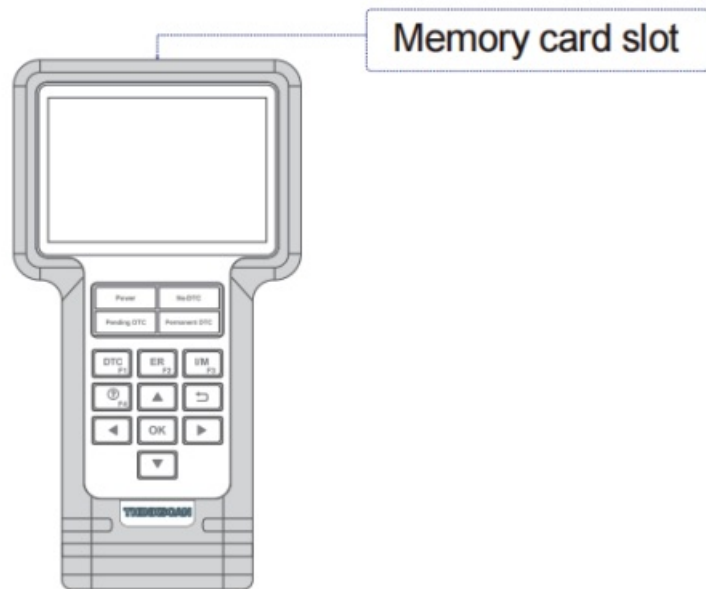

1. Go to <http://www.mythinkcar.com> to download the update tool and install it on the computer.
2. System requirements: Windows XP, 7, 8 or Windows 10.

Tip: Please check the Quick Start Guide before upgrading

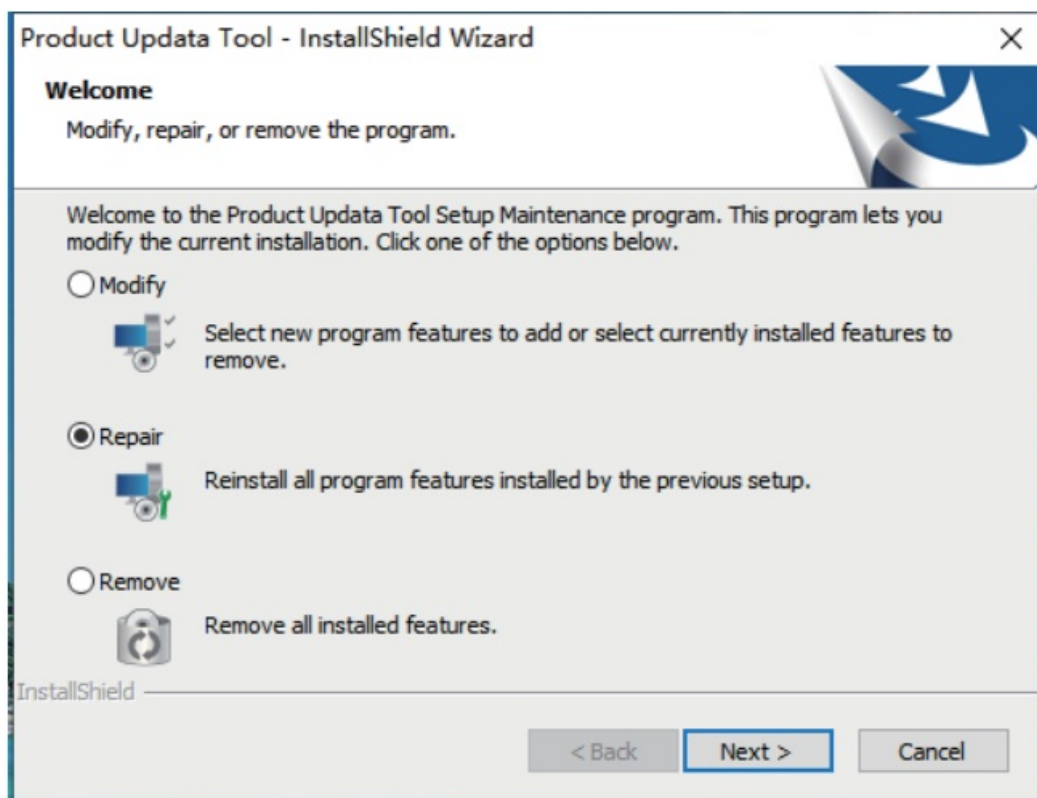

Please follow the steps below to update the tool:

1. Write down the serial number and registration code.
2. Take out the TF card at the top of the device, put the TF card into the card reader, and insert it into the computer.

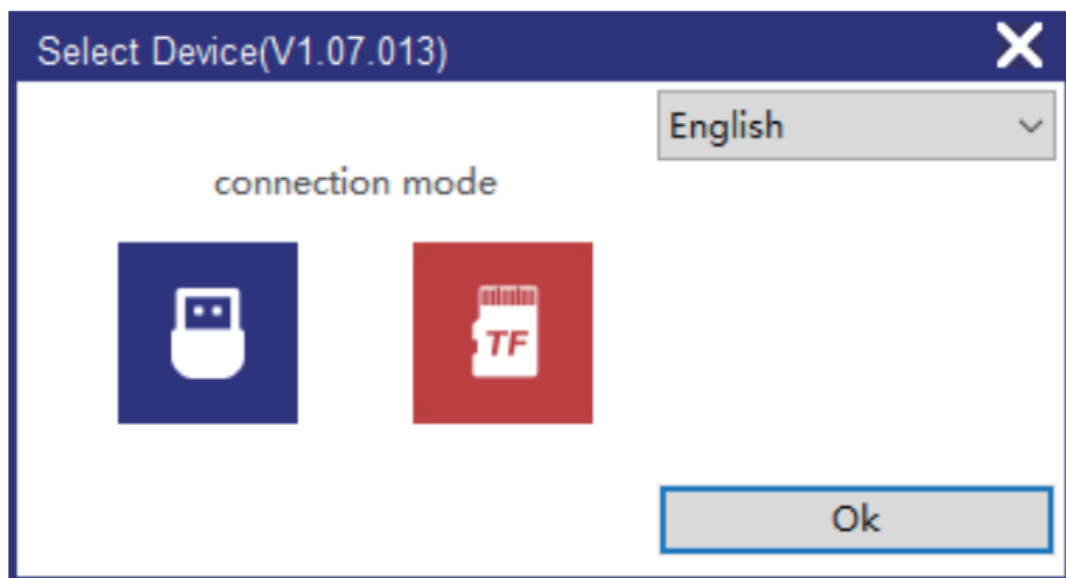

Tips: Please purchase a TF card reader by yourself

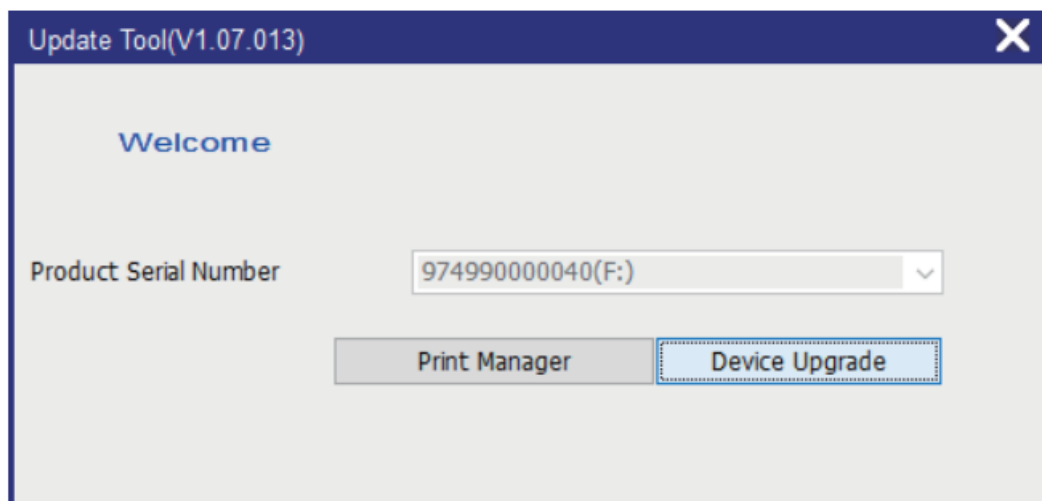

Installation tool

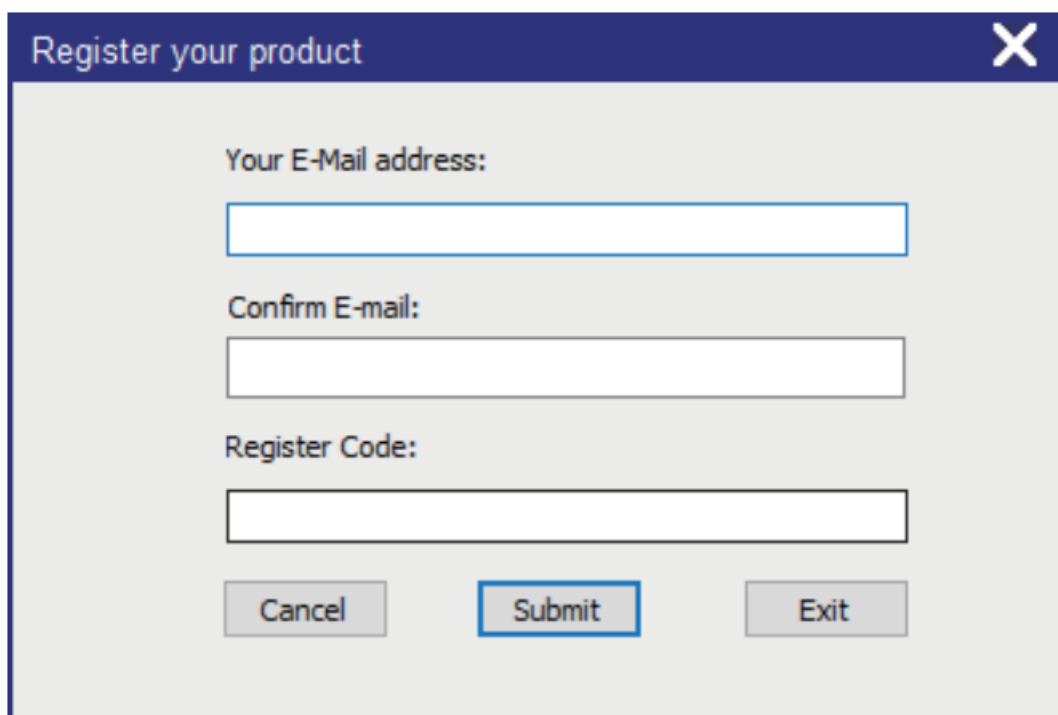

1. Choose TF upgrade mode, Click OK.

2. Check whether the SN number is consistent with the SN number of the machine, if they are consistent, click Device upgrade.

3. Enter the required E-mail address and Register Code,click [Submit] to finish the **sign-up**.

Note: For initial use, user needs to go through a registration process. Once you finished it, the registration screen will not appear again each time you click the [Device Upgrade] button in the future.

4. By default, download the latest version of the software, click download.
