## Troubleshooting

### The Game Won't Power On:

- Check if the batteries are correctly installed and have enough charge. Replace the batteries if needed.
- Ensure the power switch is turned on.

### The Screen Is Blank or Flickering:

- Ensure that the LCD screen is clean and free from obstructions.
- Try resetting the device or turning it off and on again.

### The Buttons Aren't Responding:

- Check if any buttons are stuck or obstructed. Clean the buttons if necessary.
- Try removing the batteries and reinserting them after a few minutes to reset the system.

### No Sound:

- Check the volume settings. If the sound is still not working, inspect the internal speaker for any visible damage.
- If the issue persists, the speaker may require professional repair.

### Games Won't Load:

- If the games do not load, try turning off the machine, removing the batteries, and restarting it after a few minutes.
