1m SPT-2

INSTALLATION AV TIMER OCH TRANSFORMATOR

1. Cable to transformer.
2. Cable from the timer to the lights.
3. Display

4. Photo-cell
5. Up/Down Switch Setting

CHECK!

- This is a photo-timer switch that has been designed to be connected to 12 Volt Transformers. This timer can be used for low voltage outdoor lighting.
- This timer can be installed in and outdoor uncovered. When you install the timer indoors you must take care that the timer can respond to dusk and dawn influences!
- This timer works at a temperature between -20°C and 50°C.
- Maximum Wattage to be connected to the timer is 150 Watt.

CONNECTION OF TIMER AND MAIN CABLE TO THE TRANSFORMER

- Connect the cable with the lights to the photo timer switch
- This timer should be screwed to the wall with the cable to be connected to the transformer pointing down.
- Connect the input cable of the photo timer switch to the transformer
- Insert the plug of the transformer into the electric outlet

OPERATION PROCEDURES:

0The timer switch is on, lights always burn.

AAuto: From Dusk to Dawn automatically

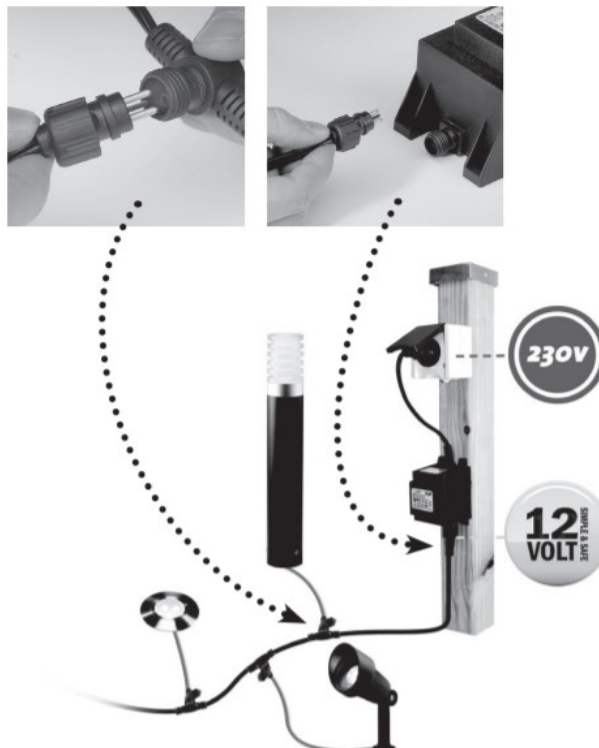

1-9Timer automatically switches on at Dusk. The timer will be switched on during the the time mentioned on the display (1-9)

With certain installation, the lights should work now. If not, check the following things:

- Connections between the main cable and the wire from the lamp.
- Check the lamps.
- When no single light is working, check the transformer and/or timer and let a specialist measure them both.

FUSE

This timer is secured against short-circuiting. – (250V – 20A)
