### Universal Strap Wrench Usage

#### Universal Strap Wrench Usage Instructions – To Tighten

1. Remove packaging & unwrap the strap from the wrench

2. Hold wrench with strap groove channel facing up

3. Place the strap into the channel with enough slack to fit your sump

4. Slide strap around sump & pull the strap towards you until tight

5.

Turn wrench to the right/counter-clockwise to tighten

### Universal Strap Wrench Usage Instructions – To Loosen

1. Flip wrench over so strap channel is facing downward

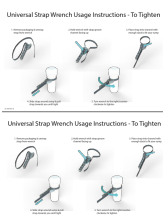

2. Slide strap around sump & pull the strap towards you until tight

3. Turn wrench to the left/clockwise to loosen
