TOPBRY BP-004 Remote Controlled Air Stone Disk

Launch Date: September 6, 2022

Price: \$29.99

Introduction

The TOPBRY BP-004 Remote Controlled Air Stone Disk is a unique aquarium accessory that is made to give both freshwater and ocean aquariums better air flow and beautiful lighting effects. This device is both useful and nice to look at. It has low noise operation, changeable airflow settings, and a sleek, long-lasting design. There are RGBW LED lights on the disk that change colors to make dynamic lighting effects that will make your tank look better. Its remote control makes it easy to use; you can change the lighting effects and airflow from a distance. With an air stone put in, it improves gas exchange and oxygenation, making the water healthier. People who like to keep aquariums and want them to look good at the same time should get the TOPBRY BP-004.

Specifications

- **Model:** TOPBRY BP-004
- **Type:** Remote Controlled Air Stone Disk
- **Dimensions:** Varies depending on the disk size (usually around 4 to 6 inches in diameter)
- **Material:** Durable plastic, with a porous stone surface for efficient diffusion
- **Airflow Output:** Adjustable (Typically around 1-2 liters per minute or higher)
- **Power Source:** Operates via low-voltage AC adapter or USB power
- **Noise Level:** Low noise operation, usually under 40 dB

- **Remote Control Range:** Typically up to 15 feet (varies by model)
- **Water Resistance:** Fully submersible, designed for aquarium use
- **Compatibility:** Suitable for freshwater and marine aquariums

Package Includes

- 1 x TOPBRY Aquarium Bubble LED Lights
- 1 x 24 Key Remote Controller(2 x AA batteries not included)
- 1 x Power Supply
- 1 x Air Tube
- 1 x User Manual

Product Overview

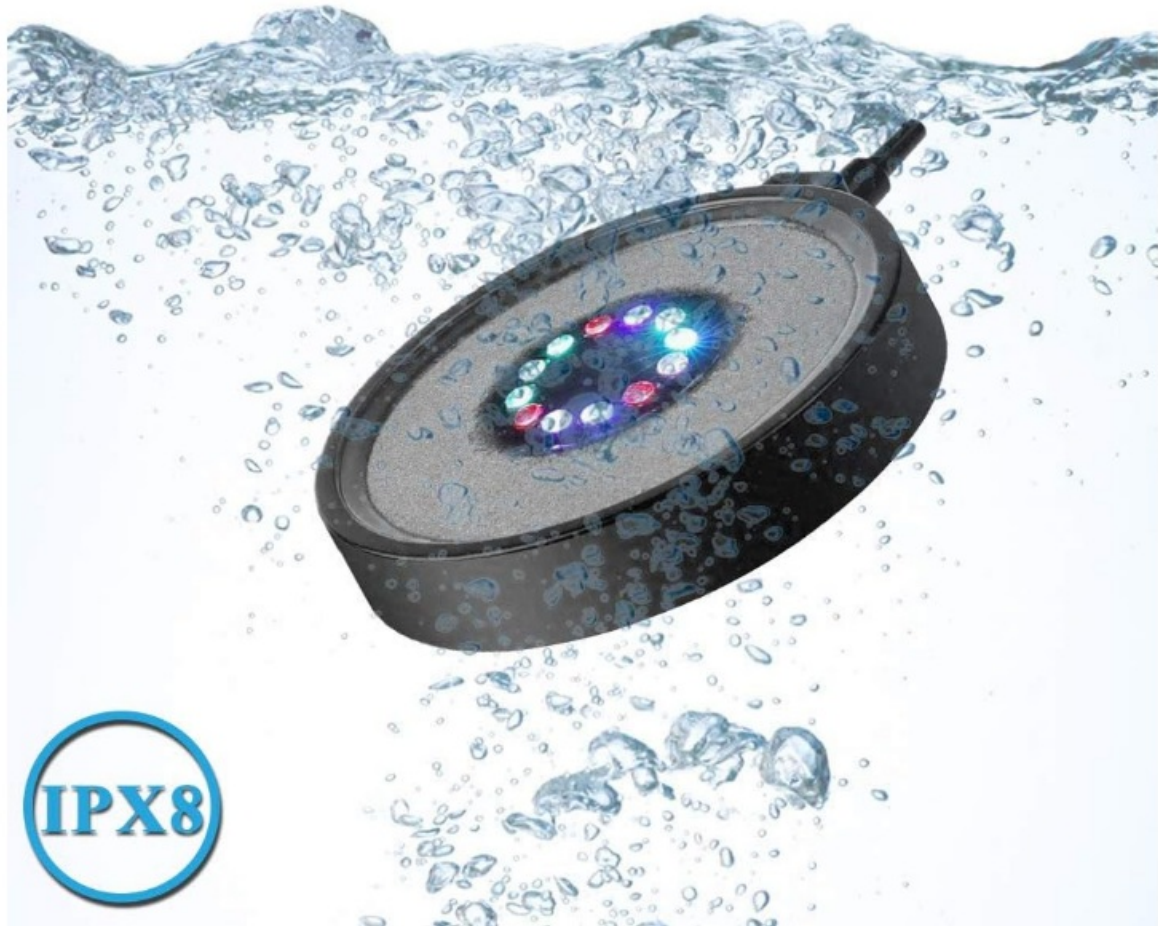

Features

1. **Remote Control Operation:** The TOPBRY BP-004 comes with a wireless remote control that lets you easily change the lighting effects and airflow from a distance. With this function, you can easily make your own aquarium environment without having to touch the device.

2. **Adjustable Airflow:** You can change the air stone's output to meet the needs of your aquarium, whether it needs gentle bubbling for a small setup or stronger aeration for a bigger or more demanding one. This flexibility makes sure that fish and plants get enough oxygen.
3. **Low Noise Operation:** This air stone disk was made to operate quietly so it won't make too much noise in your tank. It doesn't make a lot of noise, so it's quiet inside while still aerating the water well.
4. **Durable Construction:** The TOPBRY BP-004 is made of high-quality materials that make it last a long time and not rust. In this way, the disk will stay useful and nice-looking over time, even in the damp and humid environment of an aquarium.
5. **Energy Efficient:** The TOPBRY BP-004 uses very little electricity, which makes it an eco-friendly and cost-effective choice for ongoing use. Because it doesn't use much power, it won't have a big effect on your energy bill.
6. **Uses Many Places:** The air stone disk can be used in pools, tanks with both freshwater and saltwater, and other water settings. Because of how it's made, it can be used in a lot of different water settings.

The Aquarium Light can be submerged in water to provide more adequate illumination for the fish tank.

7. **Mounting with a Suction Cup:** The disk comes with a suction cup that makes it easy to stick to the tank glass. This makes sure that the placement is stable, which lets the air flow well without the need for extra hardware or a difficult set-up.

Colorful Light & Air Pump Bubble Function

8. **Color-Changing LED Lights:** The TOPBRY BP-004 has 11 RGBW LED lights that can change colors 16 different ways. You can switch between 4 lighting modes on the remote: FLASH, STROBE, FADE, and SMOOTH. This gives your aquarium a beautiful, changing show.

9. **Adjustable Brightness:** The disk has 7 levels of brightness that you can use to find the best lighting mix for your aquarium. It's easy to change the brightness of the screen, whether you want it to be dim and relaxed or brighter.
10. **Round Disc Shape:** The air stone stays steady at the bottom of the tank because it is shaped like a round disc. This increases the air stone's output area and makes the air bubble effect stronger and more appealing to the eye.
11. **Sealed Design:** The TOPBRY BP-004 can be fully submerged underwater because it is fully sealed. This makes it very good for use all the time in pools, ponds, fish tanks, and other water areas.
12. **Adding air bubbles:** The disk has an air stone built in that makes air bubbles when linked to an air pump (sold separately). This helps the tank's oxygenation and gas exchange, which is good for both marine plants and animals because it makes the water better.
13. **Low Working Voltage:** The disk is safe to use in your tank because it works at DC5V. For the best performance, you should connect the device to an air pump that gives off more than 2.5 W of power.
14. **Wide Remote Control Range:** The remote control that comes with the air stone can work up to 16.4 feet away, which makes it easy to use in big tanks or when the air stone is placed far away from where you're watching it.

15. **Manual Switch Control:** The air stone can be controlled by a remote, but it can also be controlled by hand to turn it on and off or make settings directly, which gives you more options.

Usage

1. **Setup:** Place the air stone disk at the bottom of your aquarium, using the suction cup to secure it to the glass surface. Attach the air pump and tubing to the disk as required.
2. **Remote Control:** Use the provided remote control to adjust the airflow intensity and toggle between different modes (if available, such as continuous or intermittent operation).
3. **Air Pump Connection:** Ensure that your air pump is rated to handle the air stone's requirements for optimal performance.
4. **Placement:** Position the air stone disk in a location where it can effectively diffuse air throughout the tank, promoting better circulation.

Care and Maintenance

1. **Regular Cleaning:** Periodically clean the air stone disk to prevent blockages caused by mineral buildup. Soak it in a mixture of vinegar and water, or use an aquarium-safe cleaner.
2. **Check the Air Pump:** Regularly inspect the air pump for any signs of wear and tear. Clean the intake filter to ensure optimal airflow.
3. **Replace Components:** If the remote control batteries are low or the tubing gets damaged, replace them

immediately to maintain proper functionality.

4. **Water Changes:** When performing water changes, gently remove the air stone disk to avoid disrupting any fish or other aquarium inhabitants.

Troubleshooting

No Airflow:

- Ensure the air pump is plugged in and functioning properly.
- Check the air tubing for clogs or blockages.
- Inspect the air stone disk for mineral buildup or obstructions.

Weak Airflow:

- Clean the air stone disk to remove any dirt or buildup.
- Ensure the air pump is adequate for the size of your aquarium.

Remote Control Not Working:

- Check the batteries in the remote control and replace them if needed.
- Ensure that the remote control is within the range specified by the manufacturer.

Excessive Noise:

- Make sure the airstone disk is securely mounted with the suction cup.
- Verify that the air pump is not malfunctioning or vibrating excessively.

Leaking Air:

- Check for any loose connections between the air stone, tubing, or air pump. Tighten them as needed.

Pros and Cons

Pros	Cons
Easy installation and setup	Air pump not included
Multiple color options	Requires regular maintenance
Remote control functionality	Limited range of effective air pumps
Adjustable brightness	May not fit larger aquariums effectively

Warranty

The TOPBRY BP-004 comes with a standard one-year warranty covering manufacturing defects. Ensure you keep your purchase receipt for warranty claims.

FAQs

What is the TOPBRY BP-004 Remote Controlled Air Stone Disk?

The TOPBRY BP-004 is an air stone disk that provides effective aeration and features remote-controlled color-changing LED lights for an enhanced aquarium experience.

How does the remote control work for the TOPBRY BP-004?

The TOPBRY BP-004 comes with a wireless remote control that allows you to adjust both the airflow and the LED lighting effects from a distance, providing convenience and ease of use.

What lighting effects does the TOPBRY BP-004 offer?

The TOPBRY BP-004 features 11 RGBW LED lights with 16 color-changing effects and 4 lighting modes: FLASH, STROBE, FADE, and SMOOTH, which add stunning visual effects to your aquarium.

How does the TOPBRY BP-004 contribute to oxygenation in the aquarium?

The TOPBRY BP-004 includes a built-in air stone that, when connected to an air pump, creates air bubbles to improve oxygenation and facilitate better gas exchange in your aquarium.

How can I mount the TOPBRY BP-004 in my aquarium?

The TOPBRY BP-004 comes with a suction cup mount, making it easy to securely attach the air stone disk to the aquarium glass for stable placement.

What is the remote control range for the TOPBRY BP-004?

The remote control for the TOPBRY BP-004 has a range of up to 16.4 feet, allowing for flexible operation even from a distance.

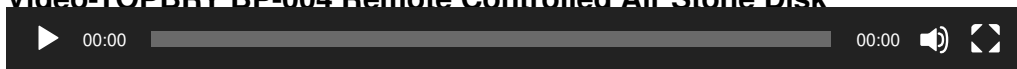

What is the voltage requirement for the TOPBRY BP-004?

The TOPBRY BP-004 operates on a low working voltage of DC5V, ensuring safe and efficient use in your aquarium.

How do I clean the TOPBRY BP-004 if algae buildup occurs?

If algae buildup occurs, simply remove the TOPBRY BP-004 from the aquarium and rinse the surface with fresh water to restore its performance.
