## A2004NS FTP server instal

It is suitable for: **A2004NS / A5004NS / A6004NS**

### How do we implement remote access to A2004NS USB shared storage files?

**Application introduction:** A2004NS support local area network and public network file sharing function. Connect a removable storage device (such as a USB flash drive, mobile hard disk, etc.) to the USB interface of the router. LAN or external network terminal equipment can access the resources in the mobile storage device, easy to achieve file sharing.
