A3002RU Upgrade the software settings

It is suitable for: **N100RE, N150RH, N150RT, N151RT, N200RE, N210RE, N300RT, N301RT , N300RH, N302R Plus, A702R, A850R, A3002RU**

Application introduction: Solution about how to upgrade Firewall on the TOTOLINK products.

STEP-1:

Connect your computer to the router by cable or wireless, then login the router by entering http://192.168.0.1 into the address bar of your browser.

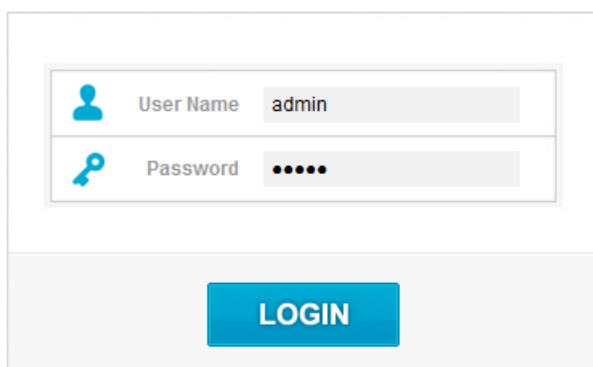

Note: The default access address varies depending on the actual situation. Please find it on the bottom label of the product.

STEP-2:

User Name and Password are required, by default both are **admin** in lowercase letter. Click **LOGIN**.

USER LOGIN

[Forget Password?](#)

A screenshot of the user login interface. It consists of a light gray box containing two input fields. The first field is labeled "User Name" with a blue person icon and contains the text "admin". The second field is labeled "Password" with a blue key icon and contains five black dots. Below these fields is a blue button with the word "LOGIN" in white capital letters. Above the input fields, there is a link that says "Forget Password?".

	User Name	admin
	Password

LOGIN

STEP-3: Upgrade the software setting

Please go to **System ->Upgrade Firmware** page, and check which you have selected. Select **Local Upgrade files**, then Click **Upgrade**.

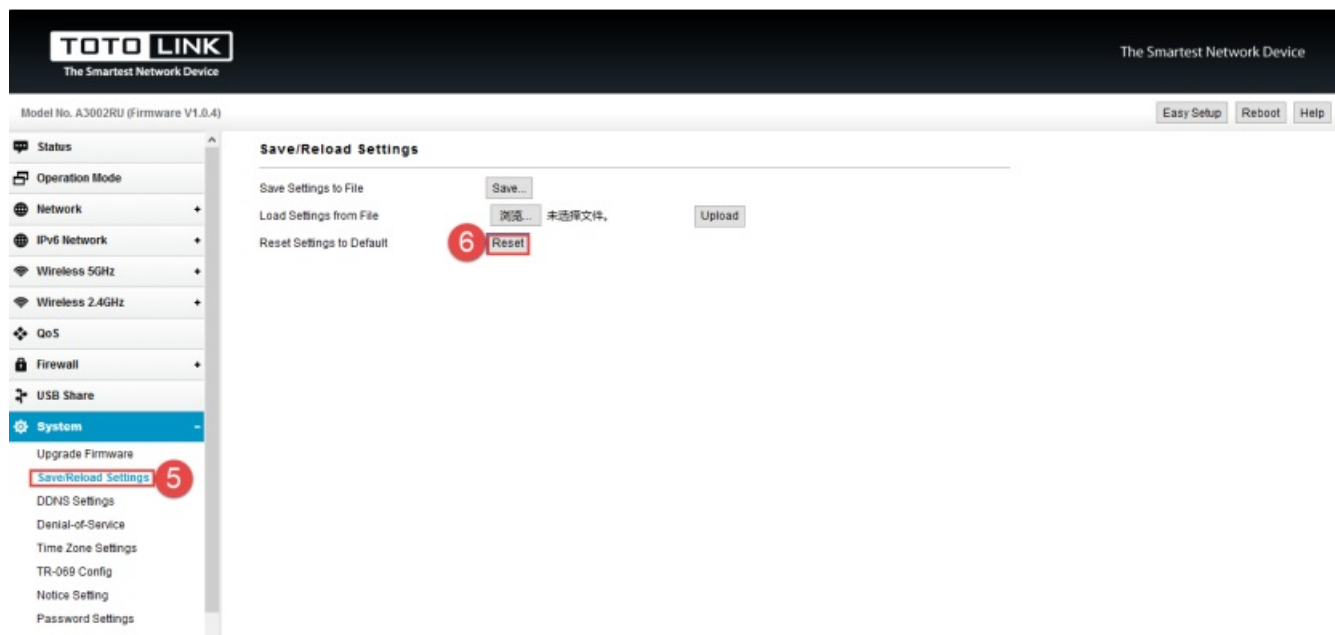

Then select **Save/Reload Settings** and click **reset**.

Note: DO Reset the router to factory default settings by RST or RST/WPS button after firmware upgrading finished.

STEP-4: System reset

Please go to **System->Save/Reload Settings** page, and check which you have selected. Then Click **Reset**.

Or please find the **RST** bottom in the box and use needle to press down the bottom more than five seconds.
