How to Find T10's Serial Number and upgrade firmware?

It is suitable for: **T10**

Set up steps

STEP-1: Guide for Hardware Version

For most TOTOLINK routers, you can see two bar coded stickers underneath each device, the character string will begin with Model No.(T10) and end with the serial number for each device.

See below:

TOTOLINK Model

V2.0=Hardware Version

STEP-2: Download Firmware

Open browser, enter www.totolink.net. Download the required files.

For example, if your hardware version is V2.0 , please download V2 version.

2 items

The correct upgrade file name is suffixed with "web"

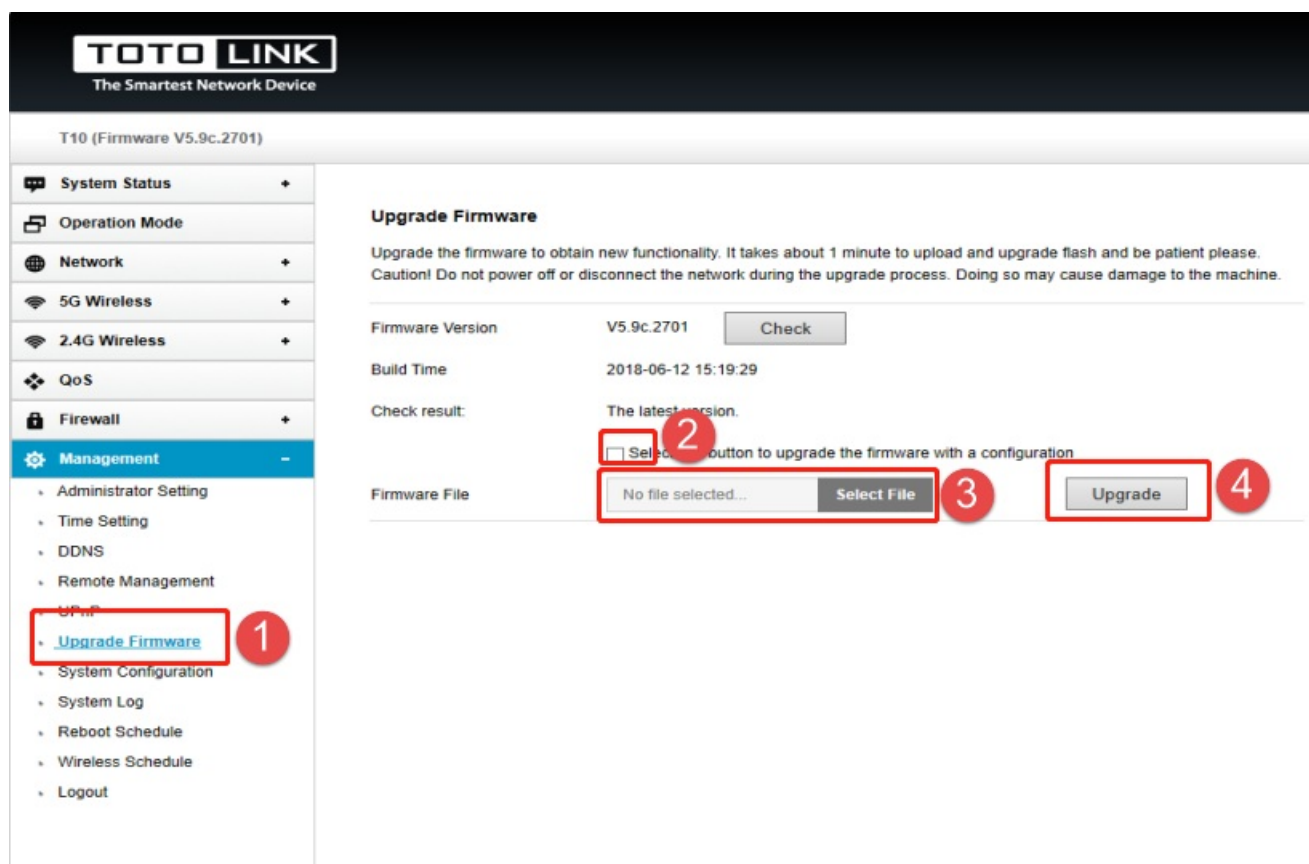

STEP-4: Upgrade Firmware

①Click Management->upgrade firmware.

②With configuration upgrade (if selected, the router will be restored to the factory configuration).

③Choose the firmware file you want to upload.

Finally④Click Upgrade button. Wait for a few minutes while the firmware is updating, and the router will restart automatically.

Notice:

1. DO NOT power off the device or close the browser window while uploading as it may crash the system.
2. When downloading the correct firmware update, you'll want to extract and upload the Web File format type
