How to properly download upgrade firmware of extender?

It is suitable for: **All TOTOLINK extenders**

Preparation

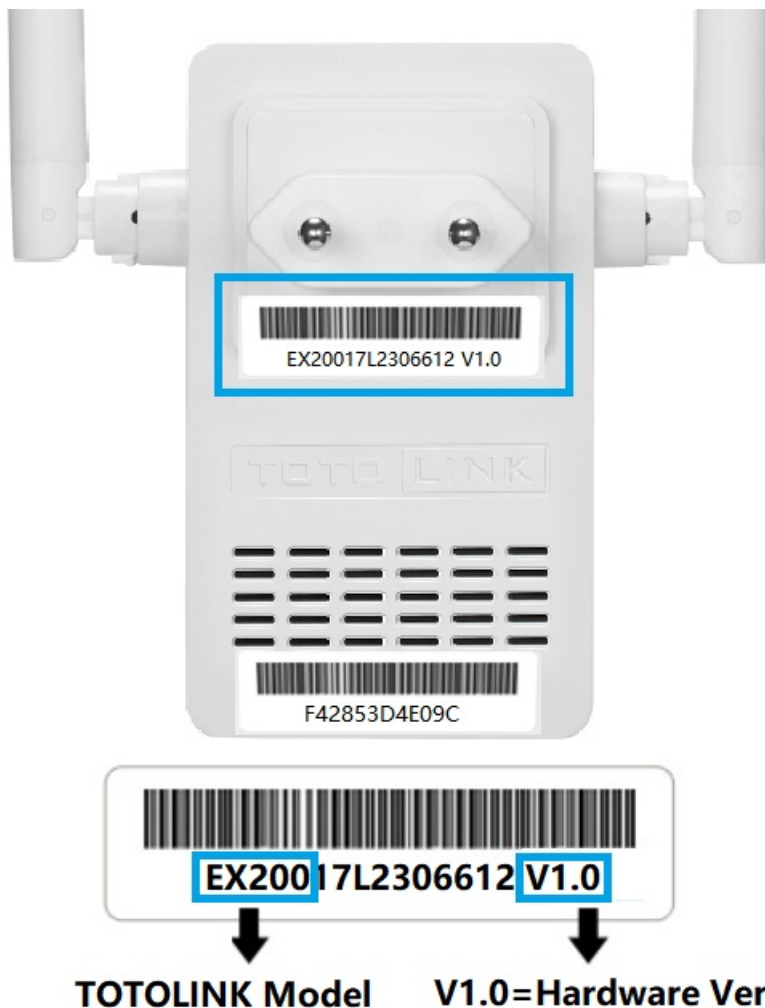

★ Before downloading files, please confirm the hardware version of your device and choose the corresponding firmware version to upgrade.

★ Wrong firmware version may damage your device and no warranty.

Set up steps

STEP-1: Guide for Hardware Version

For most TOTOLINK extender, you can see two bar coded stickers at the front of the device, the character string started with Model No.(for example EX200) and ended with Hardware Version (for example V1.0) is the serial number of your device. See below:

STEP-2:

Open browser, enter www.totolink.net Download the required files.

For example, if your hardware version is V1.0 , please download V1 version.

Note: If the hardware version is V1, V1 will be hidden.

1. www.totolink.net

2. EX200

3. Download

NO	Name	Version	Updated	Download
1	EX200_QIG	Ver1.0		↓
2	EX200_Datasheet	Ver1.0		↓
3	EX200_Firmware	V5.2.3c.4785_20170512		↓
4	EX200_Firmware	V5.2.3c.5529_B20171205		↓

Hardware version (V1 is hidden by default)

Firmware version
