How to properly download upgrade firmware of router

It is suitable for: **All TOTOLINK routers**

Preparation

★ Before downloading files, please confirm the hardware version of your device and choose the corresponding firmware version to upgrade.

★ Wrong firmware version may damage your device and no warranty.

Set up steps

STEP-1: Guide for Hardware Version

For most TOTOLINK routers, you can see two bar coded stickers at the front of the device, the character string started with Model No.(for example N300RT) and ended with Hardware Version (for example V2.0) is the serial number of your device. See below:

STEP-2:

Open browser, enter www.totolink.net. Download the required files.

For example, if your hardware version is V2.0 , please download V2 version.

Note: If the hardware version is V1, V1 will be hidden.
