It is suitable for: **N100RE, N150RH, N150RT, N151RT, N200RE, N210RE, N300RT, N301RT , N300RH, N302R Plus, A702R, A850R, A3002RU**

Contents

Application introduction:

If you can't access the router's setup interface or simply forgot the router's password, you may reset the current configuration to factory default. There are two ways to.

Method 1

STEP-1:

Connect your computer to the router by cable or wireless, then login the router by entering http://192.168.0.1 into the address bar of your browser.

Note:The default access address varies depending on the actual situation. Please find it on the bottom label of the product.

STEP-2:

User Name and Password are required, by default both are **admin** in lowercase letter. Click **LOGIN**.

Password •••••

LOGIN

STEP-3:

Click **System->Save/Reload Settings** on the navigation bar on the left.

⚙ **System** –

Upgrade Firmware

Save/Reload Settings

DDNS Settings

Denial-of-Service

Time Zone Settings

TR-069 Config

Notice Setting

Password Settings

Reboot Schedule

System Log

Statistics

Run Command

Logout

STEP-4:

Click **Reset Settings to Default** to reset the router's configuration.

Save/Reload Settings

Save Settings to File   Save...

Load Settings from File   Choose File No file chosen   Upload

Reset Settings to Default   Reset

STEP-5:

Click OK and wait for few seconds to finish resetting.

Method 2

Only by one click on the RST/WPS button

STEP-1:

Press and hold the RST/WPS button for about 10 seconds, until the CPU led blink quickly.

STEP-2:

After nearly 30 seconds, resetting is finished.
