How to set up DDNS on TOTOLINK Router?

It is suitable for: **N100RE, N150RT , N200RE, N210RE, N300RT, N302R Plus, A3002RU**

Application introduction:

DDNS (Dynamic Domain Name System) is useful for your own website, FTP server or other server behind the router.

STEP-1:

Connect your computer to the router by cable or wireless, then login the router by entering http://192.168.0.1 into the address bar of your browser.

Note:

The default access address varies depending on the actual situation. Please find it on the bottom label of the product.

STEP-2:

User Name and Password are required, by default both are **admin** in lowercase letter. Click **LOGIN**.
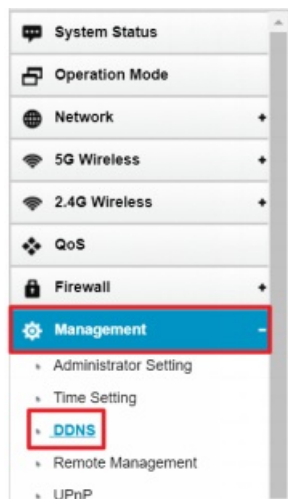

STEP-3:

Enter the **Advanced Setup** page of the router, Click **Managemet->DDNS** on the navigation bar on the left.

STEP-4:

Enter the Service Provider, Domain Name, User Name and Password in the blank space, and then click Apply to apply the modification.
