N600R MAC filter settings

It is suitable for: **N600R, A800R, A810R, A3100R, T10, A950RG, A3000RU**

Application introduction: Solution about how to configure Wireless MAC Filtering on TOTOLINK router

STEP-1:

Connect your computer to the router by cable or wireless, then login the router by entering http://192.168.0.1 into the address bar of your browser.

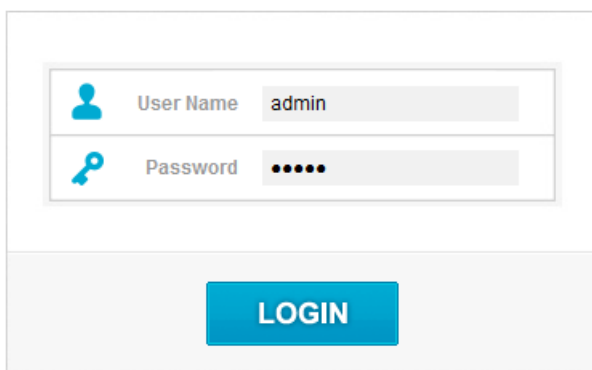

Note: The default access address varies depending on the actual situation. Please find it on the bottom label of the product.

STEP-2:

User Name and Password are required, by default both are **admin** in lowercase letter. Click **LOGIN**.

USER LOGIN

[Forget Password?](#)

A user login form. It consists of a light gray rectangular box. Inside, there are two input fields. The first field is labeled "User Name" with a blue person icon to its left; it contains the text "admin". The second field is labeled "Password" with a blue key icon to its left; it contains six black dots. Below these fields is a blue rectangular button with the word "LOGIN" in white capital letters.

STEP-3:

Please go to **Firewall ->MAC Filtering** page, and check which you have selected. Select **Enable**, then Input your own **MAC Address** which you want to restrict or click **Scan** bottom to restrict it and give a **Comment** for this item, then Click **Add**.

MAC Filtering

Entries in this table are used to restrict certain types of data packets from your local network to Internet through the Gateway. Use of such filters can be helpful in securing or restricting your local network. When [Enable] is selected, if the firewall type is [Black List], entries in this table are used to restrict certain types of data packets from your local network to Internet through the Gateway. If the firewall type is [White List], entries in this table are used to allow data packets from your local network to Internet through the Gateway. Use of such filters can be helpful in securing or restricting your local network. When [Disable] is selected, All entries in this table do not take effect.
