N600R Upgrade the software settings

It is suitable for: **N600R, A800R, A810R, A3100R, T10, A950RG, A3000RU**

Application introduction: Solution about how to upgrade Firewall on the TOTOLINK products

STEP-1:

Connect your computer to the router by cable or wireless, then login the router by entering http://192.168.0.1 into the address bar of your browser.

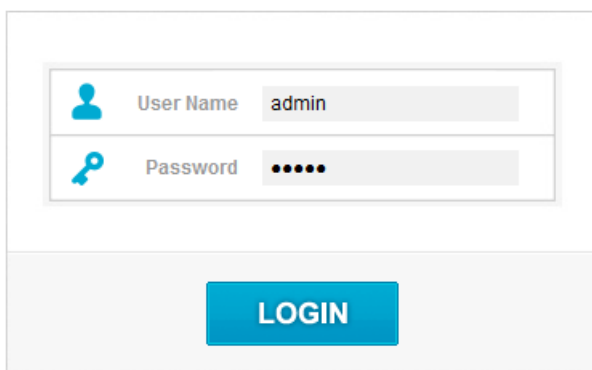

Note: The default access address varies depending on the actual situation. Please find it on the bottom label of the product.

STEP-2:

User Name and Password are required, by default both are **admin** in lowercase letter. Click **LOGIN**.

USER LOGIN

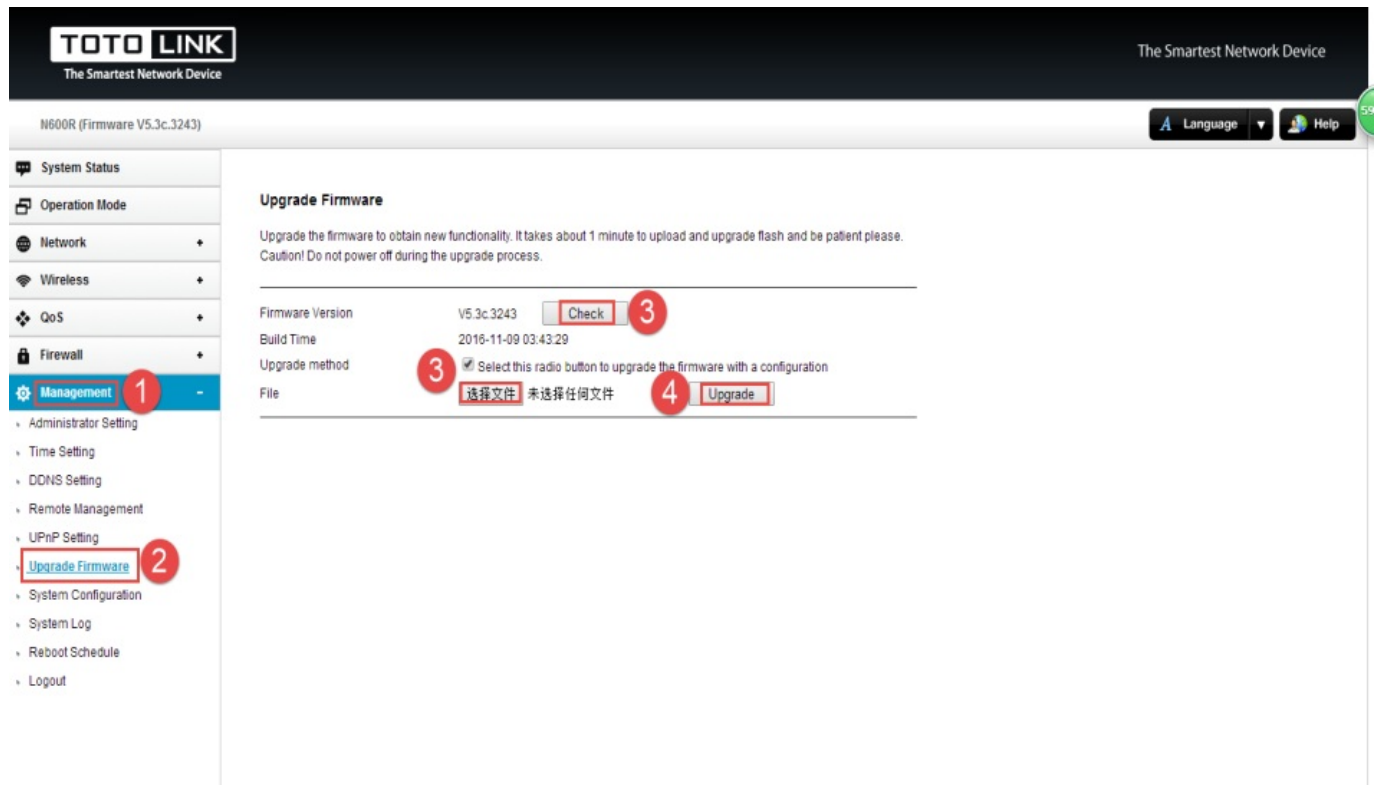

[Forget Password?](#)

A user login form. At the top right, there is a link "Forget Password?". The form is enclosed in a light gray border. Inside, there are two input fields. The first field is labeled "User Name" with a blue person icon to its left; it contains the text "admin". The second field is labeled "Password" with a blue key icon to its left; it contains six black dots. Below these fields is a large blue button with the word "LOGIN" in white capital letters.

STEP-3: Upgrade the software setting

Please go to **Management ->Upgrade Firmware** page, and check which you have selected.

Select **Check** when you can surf the internet or you can click the **Upgrade method** and **Select Local files** ,then Click **Upgrade**.

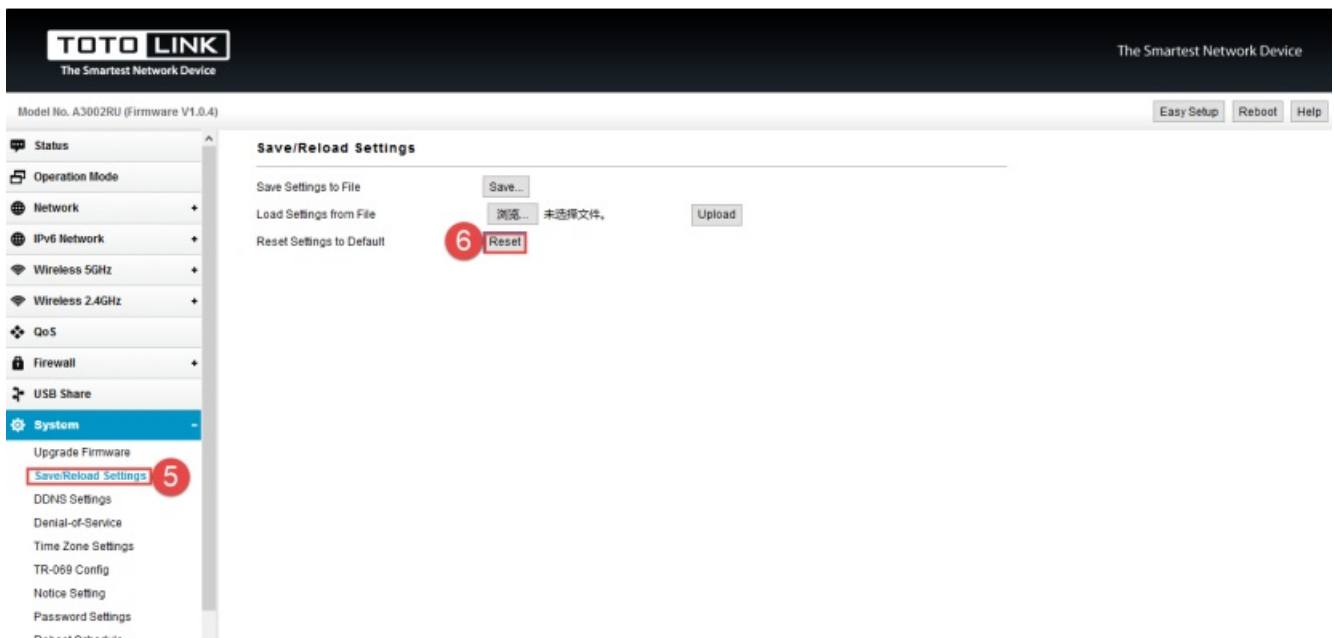

Note:

1.DO NOT power off the device during firmware upgrading.

2.DO Reset the router to factory default settings by RST or RST/WPS button after firmware upgrading finished.

STEP-4: System reset

Please go to **System->Save/Reload Settings** page, and check which you have selected. Then Click **Reset**

Or please find the **RST** bottom in the box and use needle to press down the bottom more than five seconds.
