2. Note: The watch band's solid link should be aligned with the position of the card slot.

Scan the QR code for more guidances about the watch.

5. Frequently asked questions and answers

Q. Why can not I wear a watch to take a hot bath?

A. The bath water temperature is relatively high, it will produce a lot of water vapor, and the water vapor is in the form of gas. Its molecular radius is small, so it is easy to infiltrate into the gap of the watch's casing, and once the temperature drops, water vapor will re-condense into liquid. It is easy to cause a short circuit inside the watch, hence

damaging the watch circuit board and the watch itself.

Q. Why can not the watch receive the message push?

A: 1. Confirm the message push switch is enabled on the APP.

A. 2. The confirmation message can be displayed normally in the mobile phone notification bar. The watch message push is pushed by reading the mobile phone notification bar message. If there is no message in the mobile phone notification bar, the watch will not be able to receive the push. You need to find the notification setting and open notifications for Wechat SMS, WhatsApp, Twitter etc. on the phone APP.

6.0 App download

Scanned below QR code to download TOZO Watch APP.
