tp-link LS1005 Desktop Switch

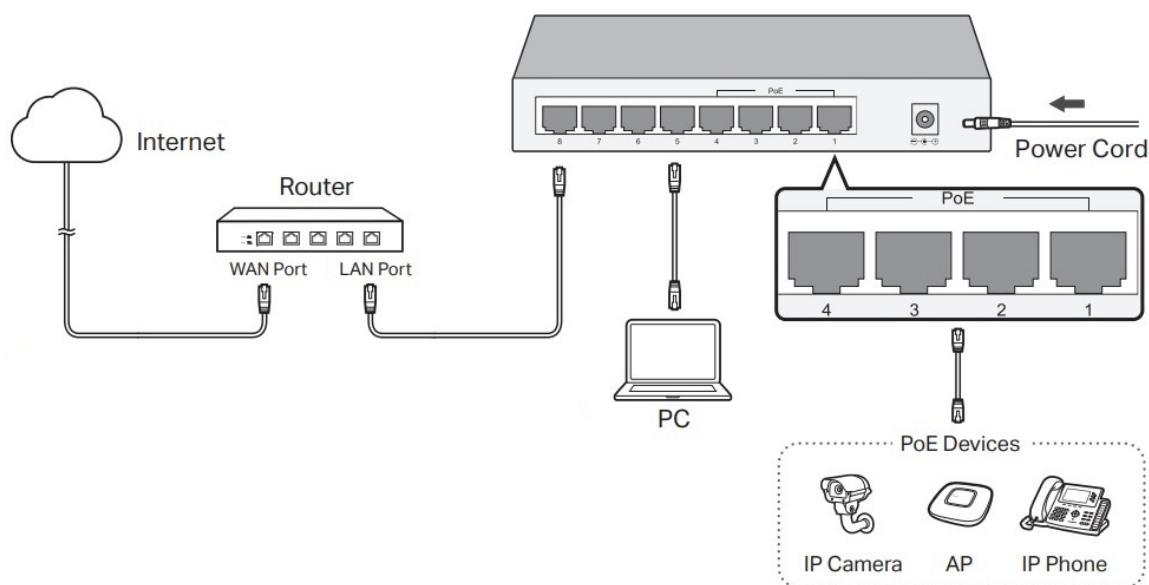

Desktop Non-PoE Switch

The image may differ from the actual product.

Desktop PoE Switch

The image may differ from the actual product.

Note:

1. PoE ports can also connect to non-PoE devices, but only transmit data.
2. Reverse PoE switch is a passive PoE switch that gets power from PoE-in ports and supplies power to connected powered device(s) via PoE-out port(s) or DC port. DC port is a power output port, do not connect it to any power source.
