Desktop Non-PoE Switch

The image may differ from the actual product.

Desktop PoE Switch

The image may differ from the actual product.

Note:

1. PoE ports can also connect to non-PoE devices, but only transmit data.
2. Reverse PoE switch is a passive PoE switch that gets power from PoE-in ports and supplies power to connected powered device(s) via PoE-out port(s) or DC port. DC port is a power output port, do not connect it to any power source.

Safety Information

Keep the device away from water, fire, humidity or hot environments.
 Do not attempt to disassemble, repair, or modify the device. If you need service, please contact us.
 Do not use damaged charger or USB cable to charge the device.
