tp-link Tapo T310 Smart Temperature and Humidity Sensor

Meet Your Temperature and Humidity Sensor

Measure the temperature and humidity of the environment and send you instant notifications when the environment changes. It is suitable for green houses, bedrooms, nursery, incubators, and wine cellars.

Before You Start

A Tapo Hub is required. Make sure your Tapo Hub is successfully added via the Tapo app.

OR

Power Up Your Sensor

Remove the battery insulation tab to power up your sensor. The LED should blink.

Note: If the LED is not blinking, use a pin to press the Reset button for 5 seconds to reset your sensor and enter pairing mode.

Set Up Your Sensor

Open the Tapo app and tap the button. Select Sensors and then your model. Follow the app instructions to complete setup.

Test Your Sensor

Take your sensor to the preferred location.

Option 1 Single press the Reset button. Your hub should make a voice prompt.

Option 2 Blow on the sensor detector. The temperature and humidity displayed on the Tapo app should change.

Place Your Sensor

Option 1: Hang with the Lanyard

Option 2: Use Adhesive Magnets

- a. Stick the included adhesive magnets to the back panel.

- b. Magnetically attach the sensor to metallic surfaces.

Option 3: Use 3M Adhesives

- a. Stick the included 3M adhesives to the back panel.

- b. Stick the sensor to your preferred location.

How to replace the battery

1. Use a pin to press and remove the cover.
2. Replace the battery with a fresh cell.
3. Put the cover back.
