Also Included :
1x Treasure USB-C to USB-A Cable

Assemble TYPE-30

Please follow the instructions of the online guide : tre.sr/support

1. Align the PLATE on top of the PCB Ensuring the PLATE notch is aligned with the top side and top edge of the keyboard

PLATE notch

2. Insert the SWITCHES into the PLATE/PCB, starting with the four (4) corner switches for stability
3. Place the Case FOAM on the bottom of the CASE.
   Position the PLATE/PCB/SWITCHES assembly in the CASE and secure it with the four (4) SCREWS
4. Install the two (2) FEET under the CASE and install the KEYCAPS
   Your Keyboard is now ready to use, connect it using the USB-C cable. The default layout is shown on the back of this card

Customize TYPE-30 with VIA

Frequently Asked Questions (FAQ)

- **Q: How do I change the RGB lighting effects?**
  A: Use the RGB TOGGLE, RGB COLOR, and RGB EFFECT keys to control the lighting effects. Refer to the manual for specific instructions on each effect.
- **Q: Can I use different keycaps and switches with TYPE-30?**
  A: Yes, you can use different keycaps and switches, but make sure they are compatible with TYPE-30 for proper functionality.
- **Q: What do I do if some keys are not functioning correctly?**
  A: Check the switch connections and ensure they are properly inserted. If issues persist, refer to troubleshooting in the manual or contact customer support.
