## IMPORTANT SAFETY INFORMATION

**CAUTION!** The individual user should determine prior to use whether this device is suitable, adequate or safe for the use intended. Since individual applications are subject to great variation, the manufacturer makes no representation or warranty as to the fit or suitability of these devices for any specific application.

## Setup and Mounting

### Installation:

1. Select a mounting location suitable to support the weight of the unit. Use 1/4" lag bolts with expansion anchors for securing to a solid structure. When mounting to a wood framed building structure, the unit must be bolted directly to a stud using 1/4" lag bolts.
2. To gain access to the base enclosure for mounting, remove the two fasteners located at the top of the housing. Slide the yellow cover up the length of the flexible stainless steel tube to expose the interior and back-plate assembly.
3. Mount unit upright as shown. Recommended mounting height is 4 to 5 feet from the floor (bottom of enclosure). Drill appropriate sized holes for the fasteners/wall anchors using the four key-hole slots in the back-plate assembly. Mount the unit as close to the door track as possible without interfering with moving parts of the door.
4. When the unit is securely fastened to the wall, slide the yellow cover back down into place and re-install the two top fasteners.
5. Plug the unit into an electrical outlet compliant with the ratings as specified on the product label.

### WARNING!

This fixture is designed for installation in general Non-Hazardous locations in accordance with the National Electrical Code and applicable local electrical codes.

**Note:** Electrical Rating for this LED module is 120-240 VAC, 50/60Hz, 14 Watts

## LIMITED WARRANTY

If it appears within one (1) year from date of delivery to Purchaser that any products or component parts do not conform exactly to the specifications and physical dimensions referred to above, and the Purchaser, at its expense, returns the product or component parts to the Seller together with a report of defects, the Seller shall review the inspection report and inspect the items and shall authorize, at its option, either the repair or replacement of any non-conforming products or component parts, whether on warranty, contract of negligence, shall not in any case exceed the amount to be paid by the Seller in obtaining and repair or replacement of non-conforming products or component parts, and upon expiration of the warranty period, all liability of the Seller shall be terminated.

Seller shall not be liable for any injury, loss or damage, direct or consequential arising out of the use or the ability

to use the product. This warranty gives specific legal rights. You may have other rights, which vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages, so that the above limitation of exclusion may not apply to you.

Designers and manufactures of specialty electrical products. Since 1922.
