Software Upgrade

In general, we do not recommend software updates when all features are working properly.

SW Upgraded via TF Card:

1. Prepare a TF card and format it as FAT32.
2. Copy the firmware named update.zip to the root directory of the TF card.
3. Insert the TF card into the product and turn it on.
4. After waiting for 30 seconds, when the blue light starts flashing fast, the product will start to upgrade.
5. After the upgrade is completed, the red and blue lights will be turned off at the same time.
6. At this time, take out the TF card and wait for the product to restart.

[**Note:** The entire upgrade process takes about 8-10 minutes. It is best not to cut off the power during the upgrade process, and do not pull out the TF card during the process of copying the upgrade file to the internal memory. Of course,if the above situation occurs, the BOX will not be damaged, and it can work normally after restarting. It's just that this time your upgrade process has been cancelled, and the normal upgrade cannot be completed.]

SW Online Upgrade

1. Insert the CarPlay/Android Auto adapter into the USB communication port of the car.
2. Link the carplay/Android Auto box to the mobile phone and enter the carplay/Android Auto interface.
3. Open the mobile web browser and enter the address "192.168.1.101".
4. Click "Online Upgrade" on the OTA page.
5. During the upgrade, do not exit the OTA page, so as not to interrupt the upgrade process.
6. When the upgrade progress reaches 70%, it will automatically exit the carplay/Android Auto interface. when the upgrade is completed, the OTA page will prompt the upgrade to be completed.
7. After the upgrade is completed, re-plug the carplay/Android Auto box to display the upgraded version. at this time, you need to delete the original Bluetooth link, and then re-establish a new Bluetooth link and use this product normally.

How to save logs?

- Any problem while using the product, you can save the log and email us. We will fix it as soon as possible.
- After inserting the TF card into the product, the log files will be automatically copied to the card, and "log copy complete" will be displayed.If "log copy complete" is not displayed after inserting the TF card, please enter"Settings" – "Other Settings", click "Copy log files to SD card" to manually copy the logs.

FCC Warnning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuan t to part 15 of the FCC Rules. These limits are designed to provide reasonable protection againstharmful interference in a residential installation. This equipment generates, uses and can radiateradio frequency energy and, if not installed and used in accordance with the instructions, maycause harmful interference to radio communications. However, there is no guarantee thatinterference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipmentoff and on, the user is encouraged to try to correct the interference by one or more of thefollowing measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
