## Components

1. LED indicator doorbell
2. Pair button
3. Volume button
4. Melody button

## Wireless control

The wireless doorbell can be operated wirelessly with a minimum of 1 and a maximum of 32 Trust Smart Home transmitters of your choice. For example, you can play a desired melody using a push button. In addition, you can also have a melody play when movement is detected and/ or when a window or door is opened. For each Trust Smart Home transmitter you can set a separate melody to hear exactly whether someone presses the push button or whether a door or window is opened.

**1. Place doorbell**
Plug the doorbell into an indoor power outlet. If you move the doorbell to a different outlet, the paired transmitters will remain in the memory.

**2. Select desired volume**
Press the volume button to select the desired volume level. There are 4 levels: High, Medium, Low and Disabled (LED Only indication).
This volume level applies to all registered channels.
You can change this volume level if desired.

**3. Select desired melody**
Then press the melody button to select 1 of the 6 melodies. You can set a separate melody per transmitter (push button, motion detector, door/window sensor) by selecting it beforehand.

## 4. Pair transmitter(s) to the doorbell

**A** Do not press the connect button for more than 1 second to activate the learning mode. The learning mode will be active for 10 seconds and the LED indicator on the doorbell will flash slowly.
**B** While the LED indicator is flashing, send an ON signal with a Trust Smart Home transmitter to link it to the doorbell. For example, while the LED indicator is flashing, you can press the push button (ACDB-8000A) to pair it
**C** As soon as the transmitter has been paired, the wireless doorbell will give 2 short beeps. The transmitter, melody and volume are now linked to the transmitter. The wireless doorbell is now ready for use.
The doorbell can store 32 different transmitters in its memory. If you want to link multiple transmitters, you need to repeat steps 2 to 4 C .

### Unpair a Trust Smart Home transmitter

**A** Press the connect button for 1 second. The learning mode will be active for 10 seconds and the LED indicator on the receiver will flash slowly.
**B** While the learning mode is active, send an ON signal with the associated channel of the Trust Smart Home transmitter you want to remove.
**C** To confirm, the wireless doorbell will give 2 short beeps Repeat this procedure to delete multiple transmitters.

## Clear Memory

**A** Press and hold the connect button (approx. 8 seconds) until the LED indicator flashes quickly. The reset mode will be active for 10 seconds and the LED indicator on the receiver will flash quickly.
**B** While in reset mode, press the learn button again for 1 second to confirm that you want to completely erase the memory.
**C** To confirm, the wireless doorbell will give 2 short beeps

## Safety Instructions

Product support: **www.trust.com/7127**0. Warranty conditions: **www.trust.com/warranty**
To ensure safe handling of the device, follow the safety advice on: **www.trust.com/safety**
